

# 314 energy storage cell

## Overview

---

The EVE 314Ah LiFePO<sub>4</sub> prismatic battery cell provides a nominal voltage of 3.2V and energy capacity of approximately 1004.8Wh. It is designed for high-power and high-capacity applications such as grid-level energy storage, commercial electric vehicles, and industrial backup power.

The EVE 314Ah LiFePO<sub>4</sub> prismatic battery cell provides a nominal voltage of 3.2V and energy capacity of approximately 1004.8Wh. It is designed for high-power and high-capacity applications such as grid-level energy storage, commercial electric vehicles, and industrial backup power.

In the field of energy storage batteries, large-capacity lithium iron phosphate (LiFePO<sub>4</sub>) batteries are popular in the market because of their safety, cost, cycle life and other advantages. In recent years, the hot sales of 280ah LiFePO<sub>4</sub> batteries from battery manufacturers such as CATL, CALB, and.

Among the latest advancements, the 314Ah lithium iron phosphate (LiFePO<sub>4</sub>) battery cell is emerging as the industry standard for home energy storage systems. Representing the second generation of large-format cells, the 314Ah cell delivers notable upgrades over its predecessor, the widely used 280Ah.

Sunwoda's 314Ah battery cell is suitable for a wide range of energy storage applications and has already been successfully deployed in both utility-scale and C&I BESS. Individual pricing for large scale projects and wholesale demands is available. Sunwoda's 314Ah battery cell is suitable for a wide.

The 314 Series LiFePO<sub>4</sub> Battery Cell is an upgraded version of the 280 series, offering higher capacity and energy density. It maintains all the advantages of LiFePO<sub>4</sub> technology while providing larger storage capacity in a similar footprint, suitable for applications requiring higher energy density.

CALB battery are a type of advanced lithium-ion batteries that offer several distinct advantages over other types of rechargeable cells. One advantage is their high energy density, meaning they can store more power per unit weight than most lead-acid batteries. Additionally, CALB battery are.

The EnerD series products adopt the new generation of 314Ah cells for energy storage, equipped with Ningde Times CTP liquid-cooled 3.0 high-efficiency grouping technology, which optimizes the grouping structure and conductive connection structure of the cells, and at the same time adopts a more.

## 314 energy storage cell
