

6 amp solar battery charger

Overview

What is the best solar charge controller?

The SunSaver 6 is a high-quality, extremely reliable but economically priced solar charge controller from Morningstar. Offering features such as their advanced PWM pulse charging algorithm, selectable battery type, and temperature compensation. Learn more about this and other controllers at BatteryStuff.com.

Is the sunsaver 6 a good solar charge controller?

The SunSaver 6 is a high quality, extremely reliable but economically priced solar charge controller from Morningstar. Offering features such as their advanced PWM pulse charging algorithm, selectable battery type and temperature compensation.

How does a solar charger work?

The solar charger converts light energy from the sun into 6 volt DC electricity which is then transported to the rechargeable batteries through lead wire and connector of choice, replace the self-discharge of a battery in storage, so that the battery wouldn't "go dead".

Do 6V batteries drain a lot of power?

As we all know, batteries naturally drain power and if allowed to go flat, may never regain their full power. This product is a solar powered battery maintainer and charger for 6V batteries and helps manage battery drain in all season.

Which solar charger should I Choose?

To ensure we can stand reliably by our choices, we tested out multiple solar chargers ourselves: the EcoFlow Bifacial Foldable Solar Panel, Goal Zero Nomad 5 Solar Charger, and BioLite SolarPanel 10+ Solar Charger. We gauged each not just on its power (which obviously differed based on the model), but

their versatility, durability, and portability.

Which solar panels are best for charging your devices?

The kickstand is made with a thin, centered style that adjusts up to 180 degrees, making it great for sliding on a backpack loop for charging your devices as you walk (but be careful—solar panels get hot!). EcoFlow's Bifacial solar panel stands as the best option for heavy-duty charging.
