

6 watt solar battery trickle charger

Overview

What is the best solar battery trickle charger?

The Coleman 6-Watt Solar Battery Trickle Charger is the ideal solution for maintaining 12-Volt batteries for your cars, RVs, tractors, ATVs, electric fences, deer feeders, boats, and more. This unit is completely weatherproof and charges in all daylight conditions, even in the shade. The built-in blocking diode protects battery discharge at night.

How do you use a solar trickle charger?

To use a solar trickle charger, you hook them up to the battery (basically clipping them in) and place the solar panel in the direct sunlight (best place possible). The battery gradually gets topped up. Trickle chargers are also thought to extend the life of your batteries. There are a few different ways to mount your solar trickle charger.

Can a solar battery trickle charger charge a dead battery?

Solar battery trickle chargers cannot charge completely dead batteries or provide a significant amount of solar energy. If you're looking to power an RV, boat, or camping setup, I would suggest considering solar power kits instead.
