

600mw energy storage project

Overview

SHENZHEN, China, June 10, 2025 /PRNewswire/ -- China's largest electrochemical energy storage project—600MW/2400MWh—has completed installation of all storage cabins in its first site, marking a key milestone as it enters the electrical commissioning phase.

SHENZHEN, China, June 10, 2025 /PRNewswire/ -- China's largest electrochemical energy storage project—600MW/2400MWh—has completed installation of all storage cabins in its first site, marking a key milestone as it enters the electrical commissioning phase.

SHENZHEN, China, June 10, 2025 /PRNewswire/ -- China's largest electrochemical energy storage project—600MW/2400MWh—has completed installation of all storage cabins in its first site, marking a key milestone as it enters the electrical commissioning phase. This is China's first ultra-high voltage.

On April 11, China's first 600MW coal-fired molten salt energy storage project completed performance tests and officially commenced operation at Longshan Power Plant of CHN Energy Hebei Branch. As a key scientific initiative of CHN Energy, the 3.2-billion-RMB project spans approximately 7,900.

Recently, two major energy storage projects, each with an investment of 850 million yuan, have been launched in Shangrao, Jiangxi Province: a 300MW/600MWh independent energy storage power station project by Jiangxi Tiehang Technology Co., Ltd., and a 300MW/600MWh shared energy storage power station.

According to information from the official website of the Shangrao Economic and Technical Development Zone, Jiangxi Railway & Aviation Technology Co., Ltd. will invest 850 million yuan in the construction of a 300MW/600MWh independent energy storage power station project, and Jinko Power Technology.

As it moves into the electrical commissioning phase, China's largest electrochemical energy storage project, 600MW/2400MWh, has reached a

significant milestone with the installation of all storage cabins at its initial location. This is the first ultra-high voltage (UHV) transmission project in.

SHENZHEN, China, June 10, 2025 /PRNewswire/ -- China's largest electrochemical energy storage project—600MW/2400MWh—has completed installation of all storage cabins in its first site, marking a key milestone as it enters the electrical commissioning phase. This is China's first ultra-high voltage.
