Where is Alpiq's battery energy storage project located?

Alpiq, a Switzerland-based electricity producer, announced the acquisition of the 100 MW/200 MWh battery energy storage project located in the department of Oise, north of Paris, France from Harmony Energy, a renewable energy project developer. The project is expected to be commissioned in autumn 2026.

Who owns Blackstone battery energy storage system?

In Q4 2023, renewable energy company Octopus Investments Australia, which is majority owned by the UK-based Octopus Group, acquired the Blackstone Battery Energy Storage System. With an expected enterprise value of US\$514 million once operational, it is the largest proposed battery project in the state of Queensland.

What is the future of battery storage?

The US is leading the global race in the development of battery storage, with demand for BESS expected to increase sixfold by the end of the decade. Capacity is expected to almost double in 2024 to more than 30 GW, as development of energy storage projects accelerates in line with the rapid growth of variable solar and wind assets.

What is a battery energy storage system?

Battery energy storage systems (BESS), which enable utility companies and grid operators to access pools of surplus renewable energy on demand that would otherwise be wasted, play a central role in the global energy transition.

Does North Carolina have a 255 MW battery storage project?

Later that month, North Carolina's Strata Clean Energy secured US\$559 million in financing for a 255-MW battery storage project in Phoenix, Arizona. The project will store enough electricity to power 50,000 homes in the state during peak summer conditions for two decades.

Is the UK ready for the next big thing in battery storage?

The UK's battery storage capacity is projected to expand to 24 GW by 2030, attracting investments of up to US\$20 billion and accounting for 9 percent of global installation capacity. Major private investors are looking to the UK for the next big thing in battery storage.
