

Agm solar battery 2v 2000 amps

Overview

What are 2V AGM solar batteries?

Our 2V AGM solar batteries are specifically designed for the photovoltaic market and will exceed 'all purpose' batteries in performance. Typically AGM batteries will last 2-3 times longer than wet batteries and will not require weekly maintenance like traditional wet batteries.

What is an example of an AGM 2 battery?

A good example of an AGM 2 battery would be the Expedition 130AH Plus AGM. Lead Carbon AGM By adding carbon graphene to the traditional AGM Type 2 battery you get Lead Carbon AGM. This adds further improvements to charging times and a typical cycle life of 1200 - 2000 cycles depending on the model.

Are AGM batteries suitable for solar use?

AGM batteries for solar are a cost-effective, high-performance alternative to lithium batteries and an excellent choice for both full- and part-time residences. With 50% being the standard for flooded lead acid batteries and 80% being the low end of the standard for lithium batteries, AGM batteries offer a good balance between cost and performance.

What is a 2 volt solar battery?

2 Volt Solar batteries are typically used in large scale solar projects where large amounts of energy are stored and transferred. Our 2V AGM solar batteries are specifically designed for the photovoltaic market and will exceed 'all purpose' batteries in performance.
