

# Analysis of energy storage project planning trend forecast chart

## Overview

---

How big will energy storage be in 2024?

According to Trendforce projections, new installations of global energy storage are poised to reach 74GW/173GWh in 2024, marking a year-on-year growth of 33% and 41%, respectively. While maintaining a notable increase, the growth rate is expected to slow down slightly.

What is the future of energy storage?

Commercial and industrial (C&I) ESS is experiencing a surge in growth, entering a phase of rapid development. The increase in installations for utility-scale ESS far outpaces that of other types. In the realm of residential energy storage, projections for new installations in 2024 stand at 11GW/20.9GWh, reflecting a modest 5% and 11% increase.

What is the market potential for diurnal energy storage?

Analysts find significant market potential for diurnal energy storage across a variety of scenarios using different cost and performance assumptions for storage, wind, solar photovoltaics (PV), and natural gas.

What types of energy storage are included?

Other storage includes compressed air energy storage, flywheel and thermal storage. Hydrogen electrolyzers are not included. Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International Energy Agency.

Is energy storage a viable option in 2024?

Utility-scale Energy Storage: Forecasted for 2024, new installations are set to reach 55GW / 133.7GWh, reflecting a solid 33% and 38% increase. The decline in lithium prices has led to a corresponding reduction in the cost of energy storage systems, bolstering the economic feasibility of utility-scale energy storage and revitalizing tender markets.

## Why is energy storage important?

Energy storage is integral for realizing a clean energy future in which a decarbonized electric system is reliable and resilient. Global installed energy storage capacity is expected to grow more than 650% by 2030 to enable more renewable energy resources and support grid modernization.
