

Auto vox solar 1 backup camera battery

Overview

The Auto-Vox Solar 1-P Wireless Backup Camera is powered by a 3,350mAh battery that charges with the solar panel that is on the mounting bracket. Before first use, it is strongly recommended that you give it a full charge using the included USB cable, typically 3-4 hours.

The Auto-Vox Solar 1-P Wireless Backup Camera is powered by a 3,350mAh battery that charges with the solar panel that is on the mounting bracket. Before first use, it is strongly recommended that you give it a full charge using the included USB cable, typically 3-4 hours.

Solar1 Pro is a completely wireless backup camera designed for outdoor activities, powered by a rechargeable battery with solar power to extend battery life. It features AUTO-VOX's patented split-type wireless lens waterproof structure, easy wire-free DIY installation, and a 5" HD monitor for safe.

Upgraded 5000mAh Battery with Extended Runtime: Keep your backup camera for truck powered for 3-4 months on a single charge with the Upgraded 5000mAh battery. Set display time to 60/90/120s, after which the screen sleeps. Reactivate the image by pressing the trigger on the car charger or side.

The backup camera is equipped with a 3350mah battery, 110 degree visibility, and a solar panel to keep the battery fully charged. This means there is no need to wire data or power lines to the back of the car. The video unit can be mounted to the car's windshield with the sticky suction cup, but.

The Auto-Vox Solar 1-P is an upgraded version of the Solar 1 backup camera, with a bigger solar panel, bigger battery, wider camera view angle, a redesigned on/off button and a re-engineered rubber plug for the USB port. The Auto-Vox Solar 1-P comes fitted on a license plate bracket so that the.
