

# Average BESS price per 8MW in Saudi Arabia

## Overview

---

Industry data reveals current BESS project costs range between \$280,000 to \$480,000 per MWh installed, depending on configuration and ancillary component.

Industry data reveals current BESS project costs range between \$280,000 to \$480,000 per MWh installed, depending on configuration and ancillary component.

As of most recent estimates, the cost of a BESS by MW is between \$200,000 and \$450,000, varying by location, system size, and market conditions. This translates to around \$200 - \$450 per kWh, though in some markets, prices have dropped as low as \$150 per kWh. Key Factors Influencing BESS Prices.

Furthermore, it is expected that each will have a 500MW output and 2,000MWh in storage capacity. The contract, which entails 15-year terms, will be awarded on a build-own-operate (BOO) model. It also entails the aspect of bidders holding 100% equity in special purpose vehicle (SPV) companies set up.

The Saudi Electricity Company (SEC) awarded a 7.8 GWh BESS contract to Al Gihaz (using a Sungrow BESS) in Q2 2024 with commissioning expected in 2025. Furthermore, SEC is tendering a 12.5 GWh BESS on a split scope basis across five sites in KSA expecting to close in the fourth quarter of 2024. The.

Lithium-ion BESS has reached commercial maturity, with 160 GWh deployed in 2024 alone. Li-ion BESS is being deployed in KSA at very-large scale through public tenders to meet growing flexibility needs. Over 19 GW / 76 GWh of BESS are planned for deployment in KSA by 2030, which would make it the.

Industry data reveals current BESS project costs range between \$280,000 to \$480,000 per MWh installed, depending on configuration and ancillary component. When evaluating battery energy storage system (BESS) prices per MWh, think of it like buying a high-performance electric vehicle - the battery.

Saudi Power Procurement Company (SPPC) announces the list of Qualified

Bidders for Group 1 Battery Energy Storage Systems (BESS) having Combined Capacity of 2,000 MW/8000 MWh across Saudi Arabia on build, own and operate (BOO) model. Following are the project locations: The List of Qualified. What is the world's largest Bess project in Saudi Arabia?

The world's largest BESS project in Saudi Arabia is one that has received accolades from the state government. Under Saudi Arabia's Vision 2030 policy roadmap, the country aims to have a 50% share of renewable energy in its grid.

How much does Bess cost?

The cost of BESS has fallen significantly over the past decade, with more precipitous drops in recent years: This is nearly a 70% reduction in three years, owing to falling battery pack prices (now as low as \$60-70/kWh in China), increased deployment, and improved efficiency.

Why is Saudi Arabia focusing on Bess?

Saudi Arabia's focus on BESS is not only a response to the country's energy needs but also a strategic move to position the kingdom as a leader in the global energy storage market.

Will Saudi be the third biggest Bess market in 2026?

And if we add recent tenders, this will lead to a whopping 33.5 GWh of BESS capacity by 2026. This would make Saudi the third biggest global BESS market after the USA and China. While KSA is certainly leading the pack, increasing deployments can be witnessed all across MENA and the Gulf or GCC region in particular.

How many bidders are in Saudi Arabia's 8GWh Bess project?

The Saudi Power Procurement Company (SPPC) has released a list of 33 prequalified bidders for its 8GWh BESS project. The projects mark the first phase of Saudi Arabia's ambitious battery storage program. It is designed to support its 50% renewable energy goal by 2030.

Which MENA region will be a Bess market in 2026?

The rapid growth rate of energy storage in the MENA region, led by the GCC, is surprising many analysts. Saudi Arabia, in particular, is set to be the third biggest global BESS market after the USA and China in 2026.
