Overview

How much does a PV system cost in Sweden?

The total price was 11.70 SEK/Wp. There have been some significant changes in the Swedish residential PV market between 2020 and 2023, for example, the size of the annual market and the number and size of companies working with PV system installations.

How is PV capacity distributed in Sweden?

The distribution of PV capacity in the four different price areas of Sweden was based on the installed PV power per municipality statistics from the Swedish Energy Agency . Some assumptions were made in the simulation to provide the most realistic data.

Are solar PV parks a good investment in Sweden?

Solar PV parks being rolled out above 100 MW do not seem far away, which will likely allow PV parks in Sweden to gain market share more quickly in terms of the total market. In summary, there may be some hurdles in the short term, but in the long term, the Swedish PV market is well-positioned for growth.

How much power does a PV system have in Sweden?

The official statistics provided by grid operators and collected by the Swedish Energy Agency only classify PV system sizes (power) into three ranges: 0–20 kW, 20–1000 kW, and >1000 kW. Table 7 summarises the total installations at the end of 2023 based on this data source.

What is the Sweden Solar power market?
