

Average Solar Panel price per 20kW in Australia

Overview

Across Australia, a quality 20 kW array installed on a standard iron or tiled roof with no major upgrades falls between \$15 000 and \$22 000, including GST and the federal STC incentive. That headline range converts to roughly \$750 – \$1 100 per installed kilowatt.

Across Australia, a quality 20 kW array installed on a standard iron or tiled roof with no major upgrades falls between \$15 000 and \$22 000, including GST and the federal STC incentive. That headline range converts to roughly \$750 – \$1 100 per installed kilowatt.

The average 20kW solar system in Australia costs between \$19,000 and \$24,000, depending on the quality of components as well as the rebate and incentive eligibility. Residents in Perth typically enjoy the lowest cost for a 20kW solar system with an average price of \$19,000, while residents in.

Across Australia, a quality 20 kW array installed on a standard iron or tiled roof with no major upgrades falls between \$15 000 and \$22 000, including GST and the federal STC incentive. That headline range converts to roughly \$750 – \$1 100 per installed kilowatt. How many panels are in a 20kw solar.

A commonly sized 6kW Solar PV System would cost between \$4,000 and \$6,000 in most states in Australia and a 10kW system would cost between \$7,500 and \$10,500. If you want to use top of the line products – see the premium solar system price table further down this page. We ask each installer on the.

The price of solar panel systems varies based on many factors such as location, system size, panel quality, and installation fees. In this detailed guide, we'll break down solar panel costs across different states, installation expenses, government rebates, and the long-term financial benefits of.

The SolarQuotes Price Explorer shows what real Australians have paid for solar, based on thousands of quotes and reviews submitted through our website. The graphs below show average system prices (after STC rebates), based on 9,569 systems installed in the last 2 years. You can filter by system.

In Australia, the typical price range for installing solar panel setups can vary between \$3,000 and \$12,500 or above, depending on the system's size, the installation spot, and how complex the installation is. For instance, a 6.6 kW solar system, which is the most common system installed in 2025. How much do solar panels cost in Australia?

In Australia, solar panel costs can vary depending on where you live, but most households can expect to pay between \$3,000 and \$10,000 after government rebates. The final price depends on things like how big your system is, the quality of the panels and parts, and how much the installation costs.

How much does a 20kW Solar System cost in Australia?

The average 20kW solar system in Australia costs between \$19,000 and \$24,000, depending on the quality of components as well as the rebate and incentive eligibility.

How much does a solar panel system cost?

The cost of installing a solar panel system is usually factored into the price of the solar system you want to install. For example, if a company advertises a 6.6 kW solar panel system's price as \$7,731, this price includes installation after the rebate.

How long do solar panels last in Australia?

Most quality solar panels are built to last 25 to 30 years, with performance warranties commonly covering 20 to 25 years. 5. How much does a 6.6kW solar system cost in Australia in 2025?

In 2025, a fully installed 6.6kW system usually ranges from \$5,000 to \$8,500, depending on location, component quality, and any applicable rebates.

How much does a commercial solar system cost?

The bigger the system, the cheaper the cost per Watt. For a 15 kW system you will pay about \$1.05 per watt installed, while for a 100 kW system you will pay closer to \$0.81 per Watt. Prices for commercial systems do vary depending on the quality of equipment used and the installer, but the above prices are a great gauge to go by.

How much does solar installation cost in Brisbane?

If you're installing solar in Brisbane, expect to pay anywhere from \$4,500 to \$7,500, depending on the brand, system size, and installer reputation. 3. Which Australian state offers the cheapest solar installations?
