A UPS (Uninterruptible Power Supply) gives you instant backup power, keeping your PC, Wi-Fi router, or gaming console running without interruption. It also protects your devices from voltage fluctuations and sudden shutdowns, preventing data loss and damage. Whether you're working from home or just.

An inverter battery is designed to provide a small amount of current for a longer duration of time. All the power backup solutions, like inverters, and UPS operate by converting the DC current into AC current as all of our electrical appliances run on AC power. Difference between inverter and.
