

# **Average business energy storage price per 5MW in Spain**

## Overview

---

The market for utility-scale storage projects remains comparatively small at around 100MW, though a pipeline of projects is beginning to emerge.<sup>2,3,4,5</sup> Much of Spain's existing utility-scale storage capacity is in concentrating solar power plants (thermal storage) and pumped hydro.<sup>6,7</sup>

The market for utility-scale storage projects remains comparatively small at around 100MW, though a pipeline of projects is beginning to emerge.<sup>2,3,4,5</sup> Much of Spain's existing utility-scale storage capacity is in concentrating solar power plants (thermal storage) and pumped hydro.<sup>6,7</sup>

Spain's household electricity prices now stand at over EUR 0.30/kWh on average. In addition, Spain's reliance on fossil gas has increased price volatility in recent years.<sup>16,17,18,19</sup> This variability, combined with Spain's excellent solar resources, make the economics of combining solar with.

The frequency of low prices (<20 €/MWh) peaks at the end of this decade and then decreases throughout the horizon due to the integration of storage sources, as they add demand during low-price hours. The frequency of very high prices (>100 €/MWh) is reduced dramatically between 2024 and 2029;.

The significant increase in both wind and solar generation capacity is creating the need for storage capacity on the Spanish grid. This need is intensified by the limited interconnection capacity of the Iberian grid with the rest of the EU. Due to the large capacity of installed hydroelectric and.

The Spain energy storage market size reached around 1.80 Gigawatt in 2024. The market is projected to grow at a CAGR of 9.50% between 2025 and 2034 to reach nearly 4.46 Gigawatt by 2034. The market growth can be attributed to the rising adoption of renewable energy sources for electricity.

A modelled 50MW, 2-hour battery, with a roundtrip efficiency of 87% and trading in the Iberian market could have captured an average margin of €7.04/kW/month between September 2021 to December 2022 with a maximum of €12.87/kW/month achieved in September 2022. Prior to 2021 the lower price.

As the country continues its transition to renewable energy sources, demand for flexible grid-balancing solutions has generated growing interest in battery energy storage systems (BESS). A recent M&A Community webinar examined the factors shaping this evolving landscape, including investor. Why do we need battery energy storage systems in Spain?

Due to the large capacity of installed hydroelectric and thermal storage systems and the resilience of the Spanish power grid, the need for Battery Energy Storage Systems (BESS) in Spain has been relatively low. The lack of a clear regulatory framework for BESS has also hindered its development in Spain so far.

What is Spain's battery storage market?

Spain's battery storage market is dominated by customer-sited systems. Utility-scale storage remains nascent. Currently, Spain's storage market is mainly composed of small-scale batteries co-located with solar PV. Spain's household electricity prices now stand at over EUR 0.30/kWh on average.

How much energy storage capacity does Spain have?

When it comes to installed energy storage capacity in general, Spain is one of the leading countries within Europe (see figure 2). Currently, Spain has 6.3GW of hydroelectric and 1GW of thermal storage capacity installed. In fact, the non-BESS storage capacity in Spain is higher than in any other European country.

Does Spain have a storage market?

Currently, Spain's storage market is mainly composed of small-scale batteries co-located with solar PV. Spain's household electricity prices now stand at over EUR 0.30/kWh on average. In addition, Spain's reliance on fossil gas has increased price volatility in recent years.<sup>16,17,18,19</sup>.

Does Spain need a Bess energy system?

Currently, Spain has 6.3GW of hydroelectric and 1GW of thermal storage capacity installed. In fact, the non-BESS storage capacity in Spain is higher than in any other European country. As a result, the need for BESS to integrate renewable energy sources into the electricity system is less immediate than in the UK, for example.

How much energy storage will Spain have by 2030?

In its National Energy and Climate Plan (NECP), the Spanish government aims to have 22.5GW of energy storage by 2030 (see table 1). This amount of storage capacity will be needed to integrate the growing capacity of intermittent generation.

## Average business energy storage price per 5MW in Spain

---

### Electricity price in Spain , ENFO

Electricity price in Spain The graph illustrates electricity price for today and tomorrow. Updates roll in daily by 12:00 (UTC) for next day electricity price.

### [Spain Unveils 820 MW Solar Energy Storage for Q4 ...](#)

Spain has announced 820 MW of energy storage projects for Q4 2024, with 182 MW focused on hybridizing solar and wind installations. Iberdrola leads this initiative, including projects like the FV Revilla-Vallejera Hybrid and ...

### [What Spain's capacity market means for storage](#)

Adding a capacity market into the mix would only increase Spain's attractiveness for energy storage investment. In the UK, the National Grid's capacity market ...

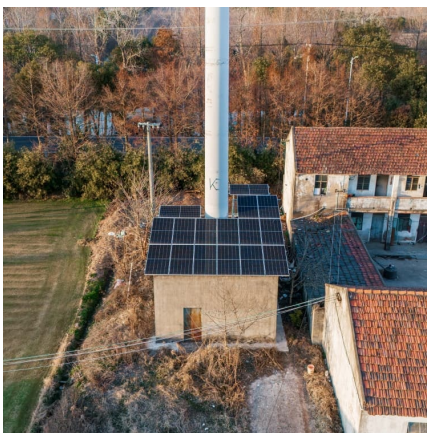

### [Average price of electricity Spain 2010-2024, Statista](#)

Average annual electricity price in Spain from 2010 to 2024 (in euros per megawatt-hour) You need a Statista Account for unlimited access

### Battery storage in Spain: Opportunities and challenges for

This constellation led to the low pool prices and the voluntary partial curtailment of nuclear power plants in Spain. At full load, the Spanish nuclear power plants generate around 170 GW/h of ...

### White paper BATTERY ENERGY STORAGE SYSTEMS ...

Wholesale market optimisation involves leveraging the energy storage assets to maximise revenues by price optimisation and time shifting in an auction for electricity delivered on the ...

### Energy Storage in Europe

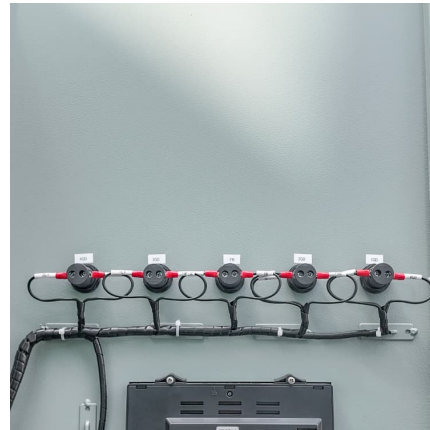

2023 BNEF global average 2024 2024 Mainland China China year-to-date year-to-date Source: BloombergNEF, ICC Battery. Note: 2023 price from BNEF's Lithium-ion Battery Price Survey. ...

### [Utility-Scale PV , Electricity , 2024 , ATB , NREL](#)

For example, in 2014, the reported capacity-weighted average system price was higher than 80% of system prices in 2014 because very large systems with multiyear construction schedules were being installed that year. Developers of ...
