The Polish Energy Storage Association works to advance energy storage and distributed energy in Poland. Advocates for the highest standards of investment safety on the energy storage market. What are the new energy storage rules in Poland?

Poland's new rules state that energy storage facilities over 10MW require licensing to ensure they can provide services to Poland's National Power System\). Facilities 10MW or smaller do not need licensing but do need to register with the transmission system operator or distribution system operator for their area.

How much storage capacity does Poland have?

On the contrary, at present, all findings in this regard are quite imprecise and subject to further revision. While Poland is believed to have an enormous overall storage capacity of around 92 Gt, (Hinc 2010a, 26) that capacity is not only approximate but also remains largely uncharacterized (Corless et al. 2011, 25).

What does ENEX 2025 tell us about energy storage in Poland?

The insights from Enex 2025 reinforce that BESS is no longer an emerging trend—it's a critical part of Poland's energy transition. With favorable market reforms and growing investment interest, the country is well-positioned to capitalize on energy storage innovations.
