

Average domestic energy storage price per 10kW in Croatia

Overview

Find out the average price of a kilowatt of electricity for households in Croatia in 2025. We analyze the factors that affect the price and how to optimize costs.

Find out the average price of a kilowatt of electricity for households in Croatia in 2025. We analyze the factors that affect the price and how to optimize costs.

According to data for 2025, the average price of a kilowatt of electricity for households ranges between 0,12 and 0,15 euros/kWh, depending on the selected tariff model and consumption. What affects the price of a kilowatt of electricity?

1. Choosing a tariff model: • Single-tariff model - A single.

With the electricity price today in Croatia you can save 0.81 € for each shower. Heating is one of the things that consumes the most electricity in a typical home. You save about 5% of the costs for heating for every degree you lower the interior temperature. What uses the most electricity at home?

The electricity price for households in Croatia is regulated by the government and depends on the total electricity consumption. According to HEP (Hrvatska elektroprivreda), the national electricity supplier, the following prices apply to households: 1. Consumption up to 3,000 kWh in six months:.

It costs €0.75 to shower for 10 minutes in . If you are showering for 10 minutes once a day, it will cost you a total of €22.5 per month. If you decide to reduce showers to 5 minutes, you would save €11.25. * This is based on showering for 10 minutes, and using 6 kWh. How much does it cost to have.

The residential electricity price in Croatia is EUR 0.160 per kWh or USD 0.186. The electricity price for businesses is EUR 0.131 kWh or USD 0.153. These retail prices were collected in December 2024 and include the cost of power,

distribution and transmission, and all taxes and fees. Compare.

Current electricity prices in Croatia for today (03.09.2025) and tomorrow. Check actual electricity spot prices. How much does electricity cost in Croatia?

Croatia, September 2023: The price of electricity for households is EUR 0.150 per kWh or USD 0.160 per kWh. The electricity price for businesses is EUR 0.148 kWh or USD 0.158 per kWh. This includes all components of the electricity bill such as the cost of power, distribution and taxes.

What makes Croatia's electricity market unique?

In conclusion, Croatia's electricity market is characterized by a balanced mix of hydroelectric power, fossil fuels, and growing renewable sources. Being part of the EU electricity market and its connections with neighboring countries are vital for its energy strategy.

How much energy does Croatia consume a year?

In 2018, final energy consumption in Croatia amounted around 6.8 Mtoe, 12.2% above its 2000 level. Residential sector was the largest consuming sector in 2018; consumption in this sector remained stable in the period from 2000 to 2018. Final energy consumption in the transport sector increased by 2.1% per year in the period from 2000 to 2018.

How much does electricity cost for a business?

The electricity price for businesses is EUR 0.148 kWh or USD 0.158 per kWh. This includes all components of the electricity bill such as the cost of power, distribution and taxes. For comparison, the average price of electricity in the world for that period is USD 0.154 per kWh for households and USD 0.151 per kWh for businesses.

Why is Croatia focusing on hydroelectric power?

This focus on hydroelectric power reflects Croatia's commitment to sustainable energy practices and environmental conservation. Despite the dominance of hydroelectricity, fossil fuels, particularly coal and natural gas, also contribute substantially to Croatia's energy mix.

Average domestic energy storage price per 10kW in Croatia

Energy in Croatia

Energy in Croatia describes energy and electricity production, consumption and import in Croatia. As of 2023, Croatia imported about 54.54% of the total energy consumed annually: 78.34% of ...
