

# **Average domestic energy storage price per 1MW in China**

## Overview

---

Current rental prices for 1MW/2MWh systems hover between ¥280,000-¥350,000 (\$38,500-\$48,200) annually. But here's the kicker: By 2025, analysts predict a 22% price drop due to: Imagine if your factory in Guangdong paid 40% more for storage rentals than a counterpart in Xinjiang.

Current rental prices for 1MW/2MWh systems hover between ¥280,000-¥350,000 (\$38,500-\$48,200) annually. But here's the kicker: By 2025, analysts predict a 22% price drop due to: Imagine if your factory in Guangdong paid 40% more for storage rentals than a counterpart in Xinjiang.

Energy storage system bid prices hit a record low In the first three quarters, the average bid price for domestic non-hydro energy storage systems (0.5C lithium iron phosphate systems) was 622.90 RMB/kWh, a year-on-year decline of 50%. While bid prices remained relatively stable in the first half.

This report analyses the winning bid price trends of energy storage systems and turnkey EPCs in China's utility-scale and C&I energy storage market in H2 2024. It is based on the prices from all the publicly announced winning bids from January 2023 to December 2024 by different districts, project.

Current rental prices for 1MW/2MWh systems hover between ¥280,000-¥350,000 (\$38,500-\$48,200) annually. But here's the kicker: By 2025, analysts predict a 22% price drop due to: Imagine if your factory in Guangdong paid 40% more for storage rentals than a counterpart in Xinjiang. That's today's.

Separate figures, from the National Energy Administration (NEA) cited in state-owned Xinhua News Agency, said that the total installed capacity of new energy storage projects reached 73.4GW by the end of 2024. With an average duration that indicates a total capacity of around 73.4GW/168GW. Market.

The cell price has dropped by 30% to \$78/kWh, equivalent to approximately 0.56 yuan/Wh in Chinese currency, while the battery pack price has decreased by 20% to \$115/kWh, or 0.805 yuan/Wh. In November 2024, the lithium-ion battery energy storage system quotation and winning bid price hit new lows.

As of March 2025, the average price for industrial-scale lithium iron phosphate (LiFePO<sub>4</sub>) battery systems has hit ¥0.456 per watt-hour (Wh) in competitive bids [4]—that's cheaper than some bottled water! Three factors are fueling this pricing freefall: Check out these real-world steals: Campers'. How much does a battery cost in China?

The cell price has dropped by 30% to \$78/kWh, equivalent to approximately 0.56 yuan/Wh in Chinese currency, while the battery pack price has decreased by 20% to \$115/kWh, or 0.805 yuan/Wh. In November 2024, the lithium-ion battery energy storage system quotation and winning bid price hit new lows again.

How much does a 1MWh battery energy storage system cost?

For a 1MWh battery energy storage system, Energetech Solar offers a system with a price of \$438,000 per unit for a 500V - 800V system designed for peak shaving applications. There are also quantity discounts available, with the price dropping to \$434,350 for purchases of 3 - 9 units and to \$431,000 for purchases of 10 or more units.

What is China's energy storage capacity?

China has total energy storage capacity of about 35 GW as of 2020, of which only 3.3 GW was new energy storage, according to the China Energy Storage Alliance.

How big is China's power storage industry?

Industry estimates show that China's power storage industry will have up to 100 million kilowatts of installed capacity by 2025, and 420 million kW installed capacity by 2060, attracting related investment of over 1.6 trillion yuan, said Li Jie, general manager of power storage at State Grid Integrated Energy Service Group Co Ltd.

What does 'new energy storage' mean for China?

Trade body China Energy Storage Alliance (CNESA) said last week (15 January) that 'new energy storage' capacity reached 78.3GW/184.2GWh by the end of 2024, a term it appears to use to describe technologies other than pumped hydro energy storage.

How much energy storage capacity will China have by 2024?

Separate figures, from the National Energy Administration (NEA) cited in state-owned Xinhua News Agency, said that the total installed capacity of new energy storage projects reached 73.4GW by the end of 2024. With an average duration that indicates a total capacity of around 73.4GW/168GW.

## Average domestic energy storage price per 1MW in China
