

# **Average grid tied storage system price per 20kWh in Philippines**

## Overview

---

How much does a grid tie inverter cost in the Philippines?

The grid tie inverter price in the Philippines of the 3.15 kWp Grid Tie Solar System ranges from P187,000 to P232,000. It is the ideal grid tie for households that want to power multiple refrigerators, daytime aircons, multiple fans, TVs, and washing machines.

Which grid tie inverter solar system is best for You?

For those households that need to power 4hp air conditioning units, refrigerators, lights, televisions, gadgets, and other appliances, or households that have a P16,000 monthly electric bill, the 5.04kWp Grid Tie Inverter Solar System is most ideal.

Why should you install a grid tie inverter?

But if there is insufficient solar power, electricity will be drawn from the utility grid. The process of sending back solar energy to the grid to use electricity anytime is called net metering and is the main reason why installing a grid tie inverter can reduce electricity bills significantly.

Should you pay for a 20kW Solar System upfront?

Paying for your 20kW solar system upfront offers the highest long-term savings, as you avoid interest payments and leasing fees. While the initial cost may be high, the return on investment (ROI) over time can be significant, particularly if you benefit from government incentives or tax breaks.
