

# **Average grid tied storage system price per 500kW in Portugal**

## Overview

---

Recent industry analysis reveals that lithium-ion battery storage systems now average €300-400 per kilowatt-hour installed, with projections indicating a further 40% cost reduction by 2030. How much does a grid connection cost?

The complexity of grid connection requirements varies significantly based on location and local regulations, with costs ranging from €50,000 to €200,000 per MW of capacity. System integration expenses cover the sophisticated control systems, energy management software, and monitoring equipment essential for optimal battery performance.

Is it possible to be competitive with grid electricity prices?

In a residential analysis is made for three USA locations, with the configuration PV + lithium-ion battery, concluding that it is possible to be competitive with grid electricity prices through an adequate sizing in those locations, using the LCOE economic indicator.

Does Germany offer a subsidy for solar photovoltaic installations with battery storage?

In 1st March of 2016, Germany has started a subsidy for solar photovoltaic installations with battery storage for residential installations: the scheme offers soft loans up to 2000 €/kW for solar photovoltaic systems and capital grant covering up to 25% of the eligible solar panel. These values are updated (downwards) every six months.
