

# **Average home energy storage price per 50kW in Ireland**

## Overview

---

When comparing the home battery storage Ireland cost, brand choice plays a big role in both price and long-term performance. Below are some of the most popular battery brands installed in Irish homes, along with their typical costs, capacity ranges, and warranty details.

When comparing the home battery storage Ireland cost, brand choice plays a big role in both price and long-term performance. Below are some of the most popular battery brands installed in Irish homes, along with their typical costs, capacity ranges, and warranty details.

Q1:What is the average home battery storage Ireland cost in 2025?

A: The average cost for a medium 6.5 kWh battery in Ireland is around €5,600 before grants, and about €3,500 after the €2,100 SEAI grant. Prices vary depending on brand, installation complexity, and whether it's part of a new solar.

On average, the initial upfront cost of a battery storage system (including the installation) is around €5,000 to €15,000. Although this number can seem quite high, when you take into account the potential savings and the benefits, you'd be surprised at just how much money you will save especially.

But for the average household - consuming 4,200kWh per year with a standard, 13.5kWh battery and allowing for 2-3 days of battery power - two batteries should suffice. How much do solar batteries cost?

Solar batteries can add between €1,500-€4,000 to the cost of solar panels. A number of things.

When it comes to choosing a solar panel battery, there are different options available for homeowners in Ireland. One common type is the lithium-ion battery, which starts at a price of €3,410 and increases depending on its capacity. These batteries have a usable capacity ranging from 3.8 kWh to.

A solar panel battery can cost between €1,500 to €7,000. The main factor that

influences the cost of a solar battery is its capacity with 5kW batteries costing between €2,000 to €3,500, while larger, 10kW batteries costing between €4,500 to €7,000. Unlike solar panel installation, there are no SEAI.

Back in 2020, you'd need €800/kWh for a commercial lithium-ion system. Today?

Try €450-€600. That's like swapping Dublin rent prices for something you'd find in Galway! Drivers behind this energy storage battery price reduction include: China's CATL flooding markets with cheaper cells (thanks. Are home battery storage systems a good idea in Ireland?

In Ireland, demand for home battery storage systems — even without solar panels — is growing rapidly as homeowners look to reduce costs and gain energy independence.

How much does electricity cost in Ireland?

Buy: Buying it on Electric Ireland's time-of-use-tariff would cost approx 30.5c/kWh for day rate, 15c/kWh during night rate and 9c/kWh for night boost rate.\* Store: You could save approx 10.5c per kWh just by using energy from your battery during day rate hours vs selling it to the grid.

How much electricity does a 3 bedroom Irish home use?

A typical 3-bedroom Irish home uses roughly 4,200kWh of electricity every single year. If all of the electricity used could be charged on the off-peak tariff you could see an annual saving of €635.88. Over ten years, you'd have paid off your battery storage system and also potentially saved €1,358.80.

How much does a battery storage system cost?

On average, the initial upfront cost of a battery storage system (including the installation) is around €5,000 to €15,000. Although this number can seem quite high, when you take into account the potential savings and the benefits, you'd be surprised at just how much money you will save especially when used in conjunction with solar panels.

How long does a solar PV system last in Ireland?

For most people, a solar PV system will pay for itself in 5-6 years. After that, it's free electricity all the way. An average household in Ireland can meet 75-100% of its electricity usage just from solar panels, though a solar battery

may be needed to reach these numbers especially if you're usually out during the daytime.

How much does a solar grant cost in Ireland?

The grant can reduce the cost of solar panels in Ireland by 25% or even more, and so it's a gamechanger for a typical family looking to go solar. In 2024, the maximum solar grant amount is €1,800, but that will be going down by €300 to €1,500 at the start of 2025. Find out more in our Irish solar grants guide.
