This means that the appendix tables for end-users will show one aggregate price for fixed-price agreements per end-user category, with no further breakdown. In Statbank, new tables will be created that take into account the new classification of fixed-price contracts, and the old tables will no.

So publicly available costs of microgrids are reported in \$/MW of DER capacity based on limited data. There are also varying project costs for community, utility, campus and commercial microgrids, the organization said. NREL along with Navigant Research (now Guidehouse) collected costs for existing.
