

# Average mobile ESS unit price per 20MW in Poland

## Overview

---

Is Poland moving towards battery energy storage systems (Bess)?

As expected, Poland's latest capacity market auctions have highlighted a significant shift towards the battery energy storage systems (BESS) beside the fact that the de-rating factor has been significantly decreased.

How many MW rated energy storage systems are there in Poland?

The capacity obligations for these projects ranged from 1.2 MW to 153 MW rated power, with an average capacity of around 30 MW. The decision to reduce the de-rating factor for energy storage systems in the last capacity market auction in Poland from 95 percent to 61 percent did not prove detrimental to the market.

Is Polish capacity market auction a success for battery energy storage projects?

From ESS News The Polish capacity market auction for 2029 which awarded more than 8 GW of capacity contracts was a success for battery energy storage projects.

What is the Polish Energy Storage Association?

Polish Energy Storage Association Polish Energy Storage Association The Polish Energy Storage Association works to advance energy storage and distributed energy in Poland.

How long does a storage unit last in Poland?

"In the Polish market, units are expected to produce their contracted capacity for four hours, leaving investors to adapt their strategy based on their storage duration and repowering plans. This is generally positive as it allows the market to determine the most effective approach."

What happened at Poland's last capacity market auction?

Poland's last capacity market auction was the first one to catalyze large amounts of BESS. Unlike previous ones, which mainly generated subsidies for existing and new coal and gas-fired power plants, the eighth capacity market auction held in December last year procured as much as 1.7 GW of energy storage.
