

Average mobile ESS unit price per 300MW in Finland

Overview

Does Finland have a power market?

Additionally, Finland is part of the Nord Pool, a regional power market that includes other Nordic countries and parts of Europe, and electricity prices in Finland can be affected by market conditions in the wider region. 19/08/2025 day-ahead!.

How does Statistics Finland collect the price of forest chips?

- The price of forest chips is based on data collected by the FOEX on forest chip transactions made by enterprises.
- Statistics Finland collects the price of peat through an inquiry aimed at peat producers and users. The collection duty was transferred to Statistics Finland in 2019 from the Bioenergy Association of Finland.

How much does a MWh system cost?

MWh (Megawatt-hour) is a measure of energy capacity (how long the system can continue delivering that power output). For example, a 1 MW / 4 MWh BESS has four hours of storage capacity. So, while the system might be \$200,000 per MW, the effective cost can be \$800,000 per MWh if it has four hours duration.
