

# **Average mobile ESS unit price per 500kW in India**

## Overview

---

Currently, the cost of battery-based energy storage in India is INR 10.18/kWh, as discovered in a SECI auction for 500 MW/1000 MWh BESS. The government has launched viability gap funding and Production-Linked Incentive (PLI) schemes to make battery storage affordable. Are energy storage systems the backbone of India's utility-scale ESS auctions?

Standalone Energy Storage Systems (ESS) are becoming the backbone of India's utility-scale ESS auctions, accounting for 64% of the total tenders issued between January and March 2025 alone, according to a new report by the Institute for Energy Economics and Financial Analysis (IEEFA) and JMK Research & Analytics.

How much does battery-based energy storage cost in India?

Currently, the cost of battery-based energy storage in India is INR 10.18/kWh, as discovered in a SECI auction for 500 MW/1000 MWh BESS. The government has launched viability gap funding and Production-Linked Incentive (PLI) schemes to make battery storage affordable.

How much ESS capacity does India have in 2025?

The report finds that various Indian agencies tendered 6.1 gigawatts (GW) of Standalone ESS capacity in the first three months of 2025. "Standalone ESS are ideal to facilitate the rapid development and deployment of variable renewable energy (VRE) resources across India.

How much does a battery system cost in India?

Our bottom-up estimates of total capital cost for a 1-MW/4-MWh standalone battery system in India are \$203/kWh in 2020, \$134/kWh in 2025, and \$103/kWh in 2030 (all in 2018 real dollars). When co-located with PV, the storage capital cost would be lower: \$187/kWh in 2020, \$122/kWh in 2025, and \$92/kWh in 2030.

How many solar panels should a 1MWh energy storage system have?

Therefore, PVMARS recommends that a 1MWh energy storage system be equipped with 500kW solar panels, and the calculation is as follows: You have a 550W solar panel and average about 4 hours of sunlight per day. It is also necessary to increase the power generation capacity by about 1MWh to supply residents' electrical loads during the day.

How battery energy storage system can help India meet peak demands?

Battery energy storage system based on low-cost lithium-ion batteries can enable India to meet the morning and evening peak demands. The Government of India (GoI) has set a target of achieving 175 GW of renewable power installed capacity by December 2022.

## Average mobile ESS unit price per 500kW in India

### [Industrial ESS 500kW/1000kWh - EnSmart Power](#)

SmartESS 500 500kW/1000kWh Industrial Energy Storage System EnSmart Power 's Smart ESS 500 is an All-in-one, containerized turn key, modular energy storage ...

### Solar Cost Calculator in India: Best Solar Plant Cost Calculator

Solar irradiance refers to the power per unit area received from the Sun in the form of electromagnetic radiation. Since solar irradiance varies significantly across different ...
