

Average nickel manganese cobalt battery price per 15MW in Philippines

Overview

Details behind the price forecasts for lithium, nickel, cobalt, manganese, and graphite can be found in the Fastmarkets Long Term Forecasts (LTFs). We expect all other material prices, such as separators, electrolyte, current collectors to reduce in price as demand increases and production scales.

For example, the price of cobalt has fallen from roughly \$70,000 per metric ton in 2022 to about \$30,000 in 2024. Similarly, the price for lithium carbonate has fallen from a high of approximately \$70,000 per metric ton to well below \$15,000 in 2024. This article focuses primarily on two of the.

The Philippines Battery Metals Market is projected to reach a value of USD 2.5 billion by 2030, driven by increasing demand for electric vehicles (EVs) and energy storage systems (ESS). Lithium and nickel are the dominant metals in the Philippines, representing over 60% of the total battery metals.

For example, the price of cobalt has fallen from roughly \$70,000 per metric ton in 2022 to about \$30,000 in 2024. Similarly, the price for lithium carbonate has fallen from a high of approximately \$70,000 per metric ton to well below \$15,000 in 2024.

Why did NCM battery cell prices drop in May?

Asian nickel cobalt manganese (NCM) battery cell prices fell to their lowest level for the first time in over three years in May, retreating significantly from the peak seen in 2022. A combination of lower critical battery raw material prices, supply glut, a sluggish demand and improving technology has kept a tight lid on NCM [.].

Why are cobalt prices consolidated?

In the weeks following confirmation that the cobalt market will face an additional three months of no exports from the Democratic Republic of Congo (DRC), metal prices have consolidated as participants point to the future for bullish sentiment.
