The per kWh price of NCM811 cell is currently the lowest in Greater China due to the low cost of battery materials, thanks to high localization, and the price difference in the manufacturing cost of these cells compared to Europe and North America. However, S&P Global Mobility forecasts a more than.

Cobalt sulphate prices duly responded, jumping more than 60% in March to average \$5,767 a tonne, and holding onto most of those gains in April. Cobalt byproduct output is also increasing in Indonesia as its nickel shipments ballooned and the DRC is now in talks with the Asian nation to collaborate.

In contrast, global nickel deployment into EV batteries increased 11% to 322.7 kt while that of manganese rose 10% to 73.6 kt and cobalt 7% to 59.6 kt as the industry continues to thrift the metal.

How big is the battery cobalt market?

The estimated size of the battery cobalt market shot up in March to an overall \$152.4 million, up 120% over February and the highest since December 2022, lifting the value of sales weighted average cobalt contained in tandem.

How much does cobalt cost in 2022?

For example, the price of cobalt has fallen from roughly \$70,000 per metric ton in 2022 to about \$30,000 in 2024. Similarly, the price for lithium carbonate has fallen from a high of approximately \$70,000 per metric ton to well below \$15,000 in 2024.

Are lithium and cobalt prices market-reflective?

This includes benchmark prices for lithium and cobalt, two battery materials that continue to experience market volatility and supply/demand imbalances. Our widely used prices are market-reflective, assessing both the buy- and sell-side of transactions.

Is cobalt coming back to EV batteries?

Cobalt consumption in EV batteries overtook other sources of demand like aerospace several years ago and the impact of the DRC strategy has been swift. The latest data from Adamas Intelligence tracking EV battery metal deployment in over 120 countries paired with monthly prices shows the cobalt market springing back into life.

Is cobalt a good month for EV sales?

While March was a good month across the board for the EV industry and by extension battery metal deployment, and January and February are generally quiet months for passenger vehicle sales, cobalt vastly outperformed other battery metals.
