

# Average off grid solar storage price per 800MW in South Africa

## Overview

---

How much does an off-grid solar system cost in South Africa?

According to GreenCape, the cost of a solar system can be repaid within just five years. So, what's a realistic off-grid solar system price in South Africa?

The range you can expect to pay to take your home completely off grid is between R150,000 and R350,000.

How much does solar cost in South Africa?

Generally, a solar power system that provides energy to most of the appliances in a relatively large house, excluding a geyser and heater, should cost around R233,000. Total Cost @ R233000.00 Source: MyBroadband What are the first steps to off-grid solar in South Africa?

.

What is the real cost of South Africa's power grid?

The real cost of South Africa's power grid, including the cost of generation (coal, nuclear, etc.), transmission, and distribution, is estimated to be R200 billion or more. This is significantly higher than the written-down book value at historic cost of R26.4 billion, reported in March 2006.

What can a 10 kW solar system run?

A 10 kW Solar System can run a range of home appliances like lights, televisions, laptops, refrigerators, and even air conditioning. In fact, a 10 kW Solar System can generate 40-50 kWh of power each day in South Africa, which is typically enough to power two small families or one large family.

Should you buy a hybrid inverter or an off-grid unit?

Even considering that you have to spend more on a hybrid inverter than an off-grid unit, not having to account for periods without sunshine can cut system

costs by a third or more. Another benefit of being grid-tied is that you can feed excess electricity back into the grid where municipalities allow it.
