

Average on grid solar storage price per 800MW in Bolivia

Overview

As a result, wholesale electricity price in Bolivia is low (average at US\$19/MWh in 2019 (CNDC, 2019)) and this is detrimental to the deployment of renewable energy in the short term.

As a result, wholesale electricity price in Bolivia is low (average at US\$19/MWh in 2019 (CNDC, 2019)) and this is detrimental to the deployment of renewable energy in the short term.

An investor has secured funding, identified a market, and drafted a comprehensive business plan for a new solar module factory—a seemingly sound project. Yet, operations are unexpectedly halted for several hours each month, damaging sensitive equipment and wasting significant material. The.

The country has vast potential for solar power generation, with an average solar irradiation of 5.4 kWh/m² per day, making it one of the most promising locations for solar energy in South America. In addition, Bolivia's mountainous terrain and high wind speeds make it an ideal location for wind.

The average of the photovoltaic power potential (PVOUT) for Bolivia is approximately 1752.78 kWh/kWp yearly and 4.8 kWh/kWp daily. ² According to official website average price for consumers was 0.05832 USD/kWh (excluding VAT) in July 2024. ³ The average cost of electricity in Bolivia for the year.

Annual Revenue = Annual Production Capacity (in Watts) x Average Selling Price per Watt
For a 50 MW (50,000,000 W) line operating at 85% efficiency, the annual output would be 42,500,000 Watts. If the average selling price for locally produced modules is USD 0.28 per Watt, the projected annual.
