High cost: \$450/kW + \$225/kWh (equivalent to \$900/kW for a 2-hour battery, \$1,350/kW for a 4-hour battery). Wood Mackenzie "all-in," whole-system costs for 2-hr front-of-the-meter energy storage costs in Asia-Pacific region, per.

For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for the southern region. For solar power plants relying on battery storage systems, the FiTs for the three regions will.

For ground-mounted solar farms without battery storage, the maximum price (excluding VAT) is set at VND1,382.7 (approximately US\$0.05)/kWh in the North, VND1,107.1/kWh in the Central region and VND1,012/kWh in the South. Floating solar plants without battery storage are entitled to higher ceilings:.

Vietnam's Ministry of Industry and Trade (MIOT) recently introduced new ceiling prices for solar and wind projects that sell electricity to Electricity of Vietnam (EVN). The ceiling price for ground-mounted solar has been slashed from \$0.0709/kWh to \$0.0502/kWh, threatening the financial viability.

ESS stands for Energy Storage System, which is a system designed to store energy for use when needed. This technology is used to store excess electricity generated from solar energy during times of low electricity prices, to be utilized when necessary, especially during peak hours or when the power.
