

Average rooftop solar battery price per 250kW in Australia

Overview

As of 2025, the installed price of a solar battery in Australia generally ranges from \$900 to \$2,000 per kilowatt-hour (kWh), depending on the brand, battery chemistry, and installation complexity. Most home batteries fall between \$8,000 and \$15,000 installed. How much do solar batteries cost in Australia?

As of May 2025, the average price of solar batteries in Australia ranges from \$900 to \$2,000 per kilowatt-hour (kWh) of storage. A 10kWh system typically costs a little over \$10,000, while a larger 16kWh system may approach \$16,000, depending on the brand, performance, and installation factors. Here's a breakdown of average prices.

How much does a 10 kWh solar battery cost in Australia?

The average price for a 10 kWh solar battery ranges between \$8,000 - \$10,000. While the uptake of solar panels in Australia is really strong, the same cannot be said for solar batteries. A newer technology, battery storage has been viewed as expensive - especially when comparing the payback of a battery system against its expected life.

How much does a solar battery cost?

Thanks to falling prices and the federal battery rebate, thousands of households can now expect payback within the warranty period, particularly if they use a lot of power at night or join a Virtual Power Plant. In summary: Price Range: Popular solar batteries have an installed cost between \$8,000 and \$13,000 including the federal rebate.

How can Australia reduce the cost of solar battery?

Australia offers various incentives that can significantly reduce the cost of solar battery: Federal Government's Cheaper Home Batteries Program (effective July 1, 2025): This national initiative offers an upfront discount of approximately 30% or up to \$372 per usable kWh of battery capacity.

Are solar batteries cheaper in 2025?

Integrated systems are often cheaper and more efficient than retrofitting batteries later. Overall, solar battery prices in 2025 are more affordable and more supported than ever before, especially in Australia, where both national and state-level programs are pushing the transition to clean energy storage.

Are batteries worth it in Australia?

We've been tracking the financial return of batteries in Australia for over a decade and regularly update our analysis of whether batteries are worth it. At the midway point of 2025 was a key turning point in this equation as the federal battery rebate was introduced which offers a discount of around 30% for a typical 10kWh battery.

Average rooftop solar battery price per 250kW in Australia

SOLAR REPORT

Despite its smaller number of installations, the Northern Territory is making significant strides in solar energy. By the end of the first quarter this year, 22,946 NT households and commercial ...

[How Much Do Solar Batteries Cost in Australia?](#)

How Much Do Solar Batteries Cost in Australia? Australians are increasingly aware that home solar batteries can minimise energy bills and deliver greater independence from the electricity grid than a rooftop solar system alone. ...

Solar Battery costs

Adding a new battery later to an old stack of series connected batteries isn't great either. Ignoring the hoops the installer has to go through, the reality is the new battery will behave like the old ones. It will be dragged down to the level of the ...

The Cost of Solar Panels

The Solar Choice Price Index measures the cost of solar power systems on a dollar per watt (\$/W) basis. This pricing metric helps consumers and industry stakeholders understand the average

prices of residential solar ...

[Average rooftop solar system sizes surpass 9 kW in...](#)

The average size of rooftop solar systems installed in Australia has climbed to a new high, with data analysis from the Australian Energy Council showing the typical unit size is now averaging

[Solar Panel Costs in Australia: 2024 Price ...](#)

Recent data analysis reveals what you might pay in your area. State-by-State Cost Comparison Price differences between Australian states tell an interesting story. Western ...

Is it worth investing in a battery for your rooftop solar?

In some cases, adding a battery to your rooftop solar system will pay off. But to be sure, households need information about many factors -- and there's no single reliable place to find it, write

[Cost of Solar Battery , Ausgreen Solar Solutions](#)

The cost of solar battery in Australia can range significantly, typically from \$8,000 to \$20,000, including both the battery unit and installation. This wide range reflects the ...

[Solar Panels Sydney: Compare Prices & Installers](#)

Overview: Installing Solar Panels in Sydney, NSW
Reliable Solar Energy Production in Sydney: With an average of 3.96 sun hours per day, a 6.6kW solar system can generate around 26.1 kWh daily, making solar a ...

[Solar Batteries Australia 2025: Costs, Brands, ...](#)

With electricity prices up 20% in NSW and Queensland since 2023, a solar battery is a smart upgrade for Australia's 4 million solar homes. The federal Cheaper Home Batteries Program slashes costs, making now the ...

[Solar Battery Storage System Cost \(2025 Prices\)](#)

A solar battery costs \$8,000 to \$16,000 installed on average before tax credits. Solar battery prices are \$6,000 to \$13,000+ for the unit alone.

SOLAR REPORT

Battery installations with rooftop solar Shown in figure 4, 2019 also marked a strong year for home battery installations with rooftop solar PV systems. Queensland led the way due to the ...

[Australia's love of rooftop solar continues to ease ...](#)

Despite stronger winter conditions, rooftop solar grew its contribution to Australia's total energy generation mix to 11.3 per cent during the first half of 2024. New South Wales also became the second state to pass one ...

2025 Solar Battery Prices in Australia: A Deep Investigation

In this guide, we dive deep into the current solar battery price landscape in Australia, covering average costs, pricing factors, government incentives, and real-world ROI calculations.

[20kW Solar System Prices, Output, Savings](#)

20kW solar system prices, output, and savings - find out what you can expect to pay and how much you can expect to save with a 20kW solar system in Australia.

250KW 300KW 500KW Solar System Cost

250KW 300KW 500KW Solar System Cost How much does a 250kW 300kW 500kW solar system cost? PVMars lists the costs of 250kW, 300kW, 500kW solar plants here (Gel battery design). If you want the price of a lithium battery ...

SOLAR REPORT

30 per cent of new solar panels nationally in the first quarter of 2023, with Queensland following closely behind with 26.2 per cent (figure 2). While Victoria and Western Australia had a ...

What can I expect my solar system to produce, on average, per ...

So - for example - in Sydney, a 5kW solar system should produce, on average per day over a year, 19.5kWh per day. Expect a system to produce more in the summer and less in the winter. ...
