

# Average warehouse solar storage price per 20kW in Greece

## Overview

---

How much does a solar system cost in Greece?

The average cost of a solar system in Greece is €3 per watt. To account for the typical energy usage of the average home in Greece, most homeowners require a 4.2-kilowatt system. Using the per-watt figure above, a solar installation costs about €8,600, or €6,450 after the federal solar tax credit of 25% is applied.

How much solar capacity will Greece have in 2022?

In 2022, 1.4 GW of new PV projects were connected to the grid, bringing the cumulative capacity to 5.5 GW. This was the best performance ever for the Greek solar sector. Still, it looks modest if you compare it with the expected performance of the market in 2023 which should bring online around 1.7 GW of solar capacity.

How is storage regulated in Greece in 2022?

In 2022, the Greek Parliament also passed a thorough regulatory framework for storage. Large-scale storage are selected through a bidding process, with a total tendered power capacity of 1,000 MW and at least 2.6 GWh of storage capacity.
