

BESS project financing options in Turkey 2030

Overview

Today, we are seeing non-recourse project finance for 600+ MW portfolios, mezzanine debt entering the capital stack, and public banks co-financing with private lenders. For developers, asset managers, and financiers alike, this is a call to sophisticate how BESS projects are packaged and financed. Is blended financing a viable financial model for Bess projects?

As per McKinsey & Company, the market size of the BESS ecosystem is expected to reach \$150 billion by 2030. Thus, blended financing as a financial model should be considered, where public capital can be used as a first-loss capital for BESS projects. This offers private financiers the comfort of providing capital at a competitive rate.

How do I secure debt for Bess & hybrid projects?

Securing debt for BESS and hybrid projects requires a "bankable" revenue forecast from lenders preferred consultants. Developers need their own flexible modelling tools to optimise project design and achieve more favourable financing terms.

What are the barriers to Bess project financing?

Emily Sidhu, director in the banking and investment team at UK Infrastructure Bank (UKIB), explains that the main barrier to the project financing of BESS projects relates to revenues.

Can Bess projects be bundled together?

Independent BESS projects, only supporting renewable energy projects, can be bundled together, and issued as green bonds to potential large investors.

Can a Bess project be issued as a green bond?

Independent BESS projects can be bundled together and issued as green bonds to potential large investors. A partial credit guarantee can be provided by public capital providers to improve the credit ratings of green bonds, which

is necessary to attract these low-risk-seeking investors.

How can a Bess adopter generate more revenue?

Another evolving model that can create an additional revenue stream for BESS adopters is the trading of green credits by virtue of facilitating clean energy. This is increasingly relevant as more countries are establishing structured and regulated carbon markets in their jurisdictions as per global best practices.

BESS project financing options in Turkey 2030

Mizuho Closes Landmark Financing for KKR and Infracapital's ...

This deal marks a significant milestone as the first BESS financing in EMEA for Mizuho, reinforcing the bank's commitment to supporting energy transition and ...

[ENGIE : BESS Development and Belgian Market](#)

Impact For BESS, CRM represent between 10 to 20% of the revenue. Complex process, complex rules and additional liabilities can frighten BESS developers. Presence of a long-term contract ...
