

# Basf deploys energy storage

## Overview

---

June 2025 - BASF has announced a strategic collaboration with Gotion High-Tech, China Gas Holdings, and BASF Shanshan Battery Materials, forming an unprecedented partnership focused on advancing energy storage systems, innovative battery materials, and green energy solutions.

June 2025 - BASF has announced a strategic collaboration with Gotion High-Tech, China Gas Holdings, and BASF Shanshan Battery Materials, forming an unprecedented partnership focused on advancing energy storage systems, innovative battery materials, and green energy solutions.

Long-duration battery energy storage system on a sodium-sulphur basis (NAS® battery) optimises energy use and stabilises power supply from renewable energy sources. As the first BASF production site worldwide, Schwarzheide is piloting green power supply for individual production parts through the.

The delivered NAS battery system consists of one set of four container type units connected in series, with maximum output of 1,000 kW and capacity of 5,800 kWh. The batteries are scheduled to be used in conjunction with a solar power generation system at BASF's Schwarzheide site, aiming to.

Invinity Energy Systems and chemicals company BASF have announced the first deployments of their non-lithium battery storage technologies in Hungary and Australia respectively. Anglo-American Invinity makes its own vanadium redox flow battery (VRFB) energy storage systems, while BASF has the.

But here's the kicker: this 158-year-old chemical titan is now charging full-speed into the \$33 billion energy storage arena [1]. Why would a company known for catalytic converters and agricultural solutions bet big on batteries?

Grab your lab goggles - we're about to mix business strategy with.

June 2025 - BASF has announced a strategic collaboration with Gotion High-Tech, China Gas Holdings, and BASF Shanshan Battery Materials, forming an unprecedented partnership focused on advancing energy storage systems,

innovative battery materials, and green energy solutions. This alliance aims to.

BASF Stationary Energy Storage GmbH sells long-duration sodium-sulfur batteries (NAS Batteries) for stationary applications. With more than 5GWh deployed over the last 20 years, NAS batteries are one of the most suitable technologies for large-scale, long-duration stationary energy storage. They. Why should you choose BASF stationary energy storage?

We at BASF want to contribute to a world that provides a viable future with enhanced quality of life. That is why we drive sustainable solutions along the complete value chain. The team of BASF Stationary Energy Storage supports you in finding the appropriate energy solution for your individual use case.

What is the energy concept of BASF?

Acquisition, Trade and Expertise – the energy concept of BASF. By 2026, BASF aims to reach our goal of 40:40:20, with 40% overall representation of women, 40% overall representation of men, and 20% either or other. Working for an awarded "Top Employer"?

BASF is one of the most attractive companies worldwide. Our differences make us successful.

What is BASF NaS battery?

Ludwigshafen, Germany, and Nagoya, Japan, June 10th, 2024 – BASF Stationary Energy Storage GmbH, a wholly owned subsidiary of BASF, and NGK INSULATORS, LTD. (NGK), a Japanese ceramics manufacturer, have released an advanced container-type NAS battery (sodium-sulfur battery). Join us - We are looking forward to meeting you!.

Does G-philos supply NaS batteries?

Since September 2020, G-Philos and BNB cooperate in P2G business with BASF supplying NAS batteries to G-Philos P2G projects. Find out more about G-Philos by following this link.
