

# Basf enters energy storage

## Overview

---

Recently, BASF entered into a four-party strategic cooperation agreement with Gotion High-tech, China Gas Holdings Limited, and BASF Shanshan, focusing on the research and development of energy storage systems, application of new battery materials, commercialization of.

Recently, BASF entered into a four-party strategic cooperation agreement with Gotion High-tech, China Gas Holdings Limited, and BASF Shanshan, focusing on the research and development of energy storage systems, application of new battery materials, commercialization of.

Long-duration battery energy storage system on a sodium-sulphur basis (NAS® battery) optimises energy use and stabilises power supply from renewable energy sources. As the first BASF production site worldwide, Schwarzheide is piloting green power supply for individual production parts through the.

The delivered NAS battery system consists of one set of four container type units connected in series, with maximum output of 1,000 kW and capacity of 5,800 kWh. The batteries are scheduled to be used in conjunction with a solar power generation system at BASF's Schwarzheide site, aiming to.

BASF is using NGK Insulators' sodium sulfur batteries as its entry point into the energy market, with the German chemical company signing up as a sales partner to the Japanese manufacturer. NGK is currently the only maker of the large-scale sodium sulfur (NAS) batteries, which have been in.

But here's the kicker: this 158-year-old chemical titan is now charging full-speed into the \$33 billion energy storage arena [1]. Why would a company known for catalytic converters and agricultural solutions bet big on batteries?

Grab your lab goggles - we're about to mix business strategy with.

BASF Stationary Energy Storage (BSES), a subsidiary of German chemical manufacturer BASF, has ordered NAS Batteries from NGK Insulators for a large-scale green hydrogen production project, developed by HH2E, a German

green hydrogen producer. The NAS batteries that have been ordered have a maximum.

Recently, BASF announced that its first enterprise energy storage project in China was officially launched at BASF's headquarters in Greater China. This new intelligent energy storage power station is located in BASF Shanghai Pudong Science and Technology Innovation Park, and is jointly built by. Why should you choose BASF stationary energy storage?

We at BASF want to contribute to a world that provides a viable future with enhanced quality of life. That is why we drive sustainable solutions along the complete value chain. The team of BASF Stationary Energy Storage supports you in finding the appropriate energy solution for your individual use case.

What is BASF NaS battery?

Ludwigshafen, Germany, and Nagoya, Japan, June 10th, 2024 – BASF Stationary Energy Storage GmbH, a wholly owned subsidiary of BASF, and NGK INSULATORS, LTD. (NGK), a Japanese ceramics manufacturer, have released an advanced container-type NAS battery (sodium-sulfur battery). Join us - We are looking forward to meeting you!.

What is the energy concept of BASF?

Acquisition, Trade and Expertise – the energy concept of BASF. By 2026, BASF aims to reach our goal of 40:40:20, with 40% overall representation of women, 40% overall representation of men, and 20% either or other. Working for an awarded "Top Employer"?

BASF is one of the most attractive companies worldwide. Our differences make us successful.

What is NGK & BASF NAS model L24?

One of the world's most widely deployed non-lithium electrochemical energy storage technologies has received an upgrade, with the launch of NGK and BASF Stationary Energy Storage's the NAS MODEL L24.
