

# Battery tender junior solid red

## Overview

---

The solid red light on the Battery Tender Junior indicates that the battery is connected properly and the charger is still in the charging stage. If it remains solid red after two days, the battery has not yet completed charging.

The solid red light on the Battery Tender Junior indicates that the battery is connected properly and the charger is still in the charging stage. If it remains solid red after two days, the battery has not yet completed charging.

Read on to learn about the different types of light indicators you may see from your Battery Tender charger and how to troubleshoot them. Below is a photo that shows what the lights on your Battery Tender charger are trying to tell you. Use this as a quick-hit guide for some of your most common.

When we connect a Battery Tender Junior to a battery, observing a solid red light indicates that the device is properly engaged in charging. The red light is a clear signal that the Battery Tender Junior has established a correct connection to the battery and is actively pushing current to.

NOTE: The BTJR must be connected correctly to both the AC power outlet and the battery before the single LED will come on and turn RED indicating that a normal charge cycle has begun. No AC power available. Insure AC power is available. No Indicator lights are lit. NOTE: The BTJR must be connected.

On a Battery Tender Junior 800, a solid amber light indicates the battery is charging. A solid green light means the battery is fully charged and the charger is maintaining the charge. This answer is automatically generated I've had the better tender on my vehicle for two days and it's still solid.

IIRC the flashing green is 80% charged, solid green is fully charged / float mode, and solid red is showing the charger working to bring a discharged battery back up (to 80% I guess). Flashing red indicates it's not connected to a good battery, or there is an internal problem with the battery you.

Left it overnight on battery tender, light still red in am. It started right up, rode it again the next day, no problems, reading 14 volts, starts right after I shut it

several times. Tender has been hooked up continuously for several days now without the light turning green. Tried a different.
