.

What does a battery tender indicator light mean?

Flashing red: not charging battery Solid red: battery charging Flashing green: battery greater than 80 percent charged Solid green: monitoring charged battery This light guide applies to the core line of Battery Tender products, so please check your chargers manual for specific lighting instructions. FAQs about Battery Tender indicator lights.

Why is my battery tender blinking red and green?

The alternating red and green lights are due to one very common reason, and that is connecting the battery terminals wrong. That means, if you have connected the battery terminals with the charger opposite, that will cause the issue, and then you will have to face the issue with the battery tender blinking red and green alternatively.

Why is my battery tender Charger blinking?

This is pretty simple for sure, and with that, you get to enjoy the perfection of having the fully charged battery as well at the same time. If the red and green lights on your Battery Tender charger are blinking together, that means your charger is connected to the AC power, but it is not connected to the battery properly.

Why is my battery tender not showing a light?

If your Battery Tender isn't showing any lights (red or green), it could indicate a power issue, faulty wiring, or an internal malfunction within the charger. Try unplugging and re-plugging the charger, ensuring the connections are secure. If the lights still don't come on, the charger might be broken.

Why does my battery tender flash a yellow light?

If the battery tender flashes a yellow light, it indicates that the charger or the battery itself is defective. If the yellow light continues flashing rapidly, then the charger is not getting enough power from the power source. On the other hand, if the yellow light remains solid, the charger is not connected correctly to the battery.
