There have been reports from Beats Solo 3 users experiencing battery drain problem on their headphones. Although Beats Solo 3 is a durable and reliable headphone, there are instances when certain issues can occur such as battery is draining fast. In here, let us go through possible solutions that.

The Beats Solo³ are one of the headphones with the longest battery life on the market, which is about 40 hours straight with a full battery charge. So, if your Beats Solo³ are underperforming concerning the battery, there are many reasons and respectively many solutions for this problem. To prevent.

Recently when I fully charge my Beats Solo 3 headphones, I won't use them throughout the day but when I try to turn them on later the battery says that it's empty. What do I do to keep the battery from draining when I'm not using my headphones?

Posted on Jun 21, 2019 05:33 PM Posted on Jun 22, 2019.

I have a pair of solo3 but they don't last as long as they used to. It'll show that it's fully charged but only last about 15 or 20 mins until the battery dies. : r/beatsbydre I have a pair of solo3 but they don't last as long as they used to. It'll show that it's fully charged but only last about.

Now, with a fresh battery, I'll charge it and still only get ~5 hours worth of use, because the battery will even drain while it is off. I've also tried resetting them after I replaced the battery. Still no luck there. Anybody have a solution?

Is it time to replace them?

Is this a good question?

My.

The first thing we would recommend would be to reset the Beats Solo3 Wireless following these steps found at [Reset your Beats on-ear or over-ear headphones - Apple Support](#): 1. Hold down the volume down button and the power button for 10 seconds. 2. When the Fuel Gauge flashes, release the buttons. How long does a Beats Solo 3 battery last?

Thanks to a battery life of 40 hours, Beats Solo 3 Wireless is your perfect everyday reliable headphone. With Fast Fuel, a 5-minute charge gives you 3 hours of playback. Have a great sound and voice experience with on-ear controls and beam-forming mics for some quality wireless listening freedom.

Why is my beats solo3 battery draining so fast?

If you're blasting the headphones at full volume every second you use, you'll likely see a dip in battery performance. The same can be said for being too far away from your device. If your phone and the Beats Solo3 are struggling to stay paired over Bluetooth, you'll likely burn through the battery power a little faster.

Why are my beats solo3 wireless headphones draining so fast?

Your Beats Solo3 Wireless should provide you with 40 hours of music playback when charged properly. The headphones draining so fast may be due to several reasons, which stem from the battery. For reference, the batteries powering the Apple headset are of the lithium polymer variety.

Why is my beats solo3 not charging?

Another factor contributing to your Beats Solo3 not charging is overly discharged batteries. It's something that occurs when you've left your headphones hanging for quite a long time. The reason for this lies with the kind of battery the Apple device uses, which is of the lithium-ion variety.

Will beats solo3 work without a battery?

The Beats Solo3 will work even without a battery because it sourced its power from the device it is connected to. Consider your headphones as a smaller,

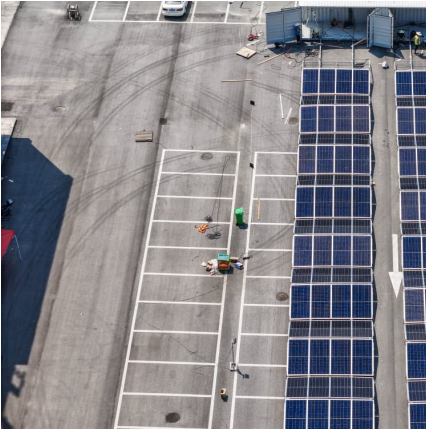

more portable speaker. In fact, it is built like one, powered by an amplifier that can process the conversion process.

How long does it take to charge a beats solo3?

Check for the five white lights on the indicator, which signals that the headphones are full and ready for use. Once you see all the lights lit up, your device is ready to give you another 40 minutes of music streaming. It will usually take you two hours to fully charge your Beats Solo3.
