## Overview

---

Which solar charger should I Choose?

To ensure we can stand reliably by our choices, we tested out multiple solar chargers ourselves: the EcoFlow Bifacial Foldable Solar Panel, Goal Zero Nomad 5 Solar Charger, and BioLite SolarPanel 10+ Solar Charger. We gauged each not just on its power (which obviously differed based on the model), but their versatility, durability, and portability.

What is the best portable solar charger?

The Allpowers SP012 Solar Panel 100W is the best portable solar charger for anyone who needs to keep their gadgets charged and stay connected during a power outage or off-grid adventure.

Should you buy a portable solar battery charger?

A portable solar battery charger is a great option if you're taking an extended camping trip or traveling somewhere with an unreliable power grid, as it'll allow you to charge a phone the size of an iPhone 15 using just a few hours of midday sun.

Is a solar charger a good idea?

A solar charger is more functional if you can angle it at the sun with integrated kickstand legs. Many solar-powered devices can reliably charge more than one device at the same time. This is important if you'll be sharing power among a group of people or have lots of tech to keep powered.

Which solar charger is best for camping?

The FlexSolar 40W's six panels are quite easy to fold up. The Allpowers SP012 100W is the most portable 100-watt solar charger for camping we've found. This model folds up like a blanket to a size small enough to fit in a backpack. You can fit this solar charger into your trunk, with plenty of room to spare for all your gear.

Can a solar panel charge a battery?

These chargers are usually designed to be used more like a portable battery pack and less like a solar panel because the solar panel often isn't big enough to reliably generate a lot of power from the sun. The panel will work in a pinch, but it can be slow to charge the integrated battery.
