

Best tariff for solar and battery uk

Overview

The best SEG tariff currently available is Octopus Energy's Intelligent Octopus Flux, which provides up to 30.31p/kWh for customers with solar panels and compatible batteries. This tariff stands out in SEG tariff comparisons as one of the best export tariffs for solar panel owners.

The best SEG tariff currently available is Octopus Energy's Intelligent Octopus Flux, which provides up to 30.31p/kWh for customers with solar panels and compatible batteries. This tariff stands out in SEG tariff comparisons as one of the best export tariffs for solar panel owners.

Good Energy pays up to 40 p/kWh, while Octopus Flux offers 29.5 p/kWh for solar + battery users. However, there are specific requirements for accessing these tariffs. With export rates of up to 26.2 p/kWh, Flux lets you charge at low rates and sell at high rates, increasing savings on your energy.

The best SEG tariff is Octopus Energy's Intelligent Octopus Flux, which rewards customers with Octopus as their supplier and a compatible battery with 30.31p/kWh during peak hours (4-7 pm) and 22.73p/kWh at other times. The average SEG rate is between 5 to 10p/kWh. By taking advantage of the best.

This is where choosing the right electricity tariff comes in. For homes with Solar, Battery Storage or EV Chargers, traditional fixed-rate tariffs mean you're leaving big money on the table, extending the time before you see a return on your investment by several years. They don't take advantage of.

If you have solar panels, battery storage, an electric car – maybe even a heat pump – what's the best electricity tariff to be on that will save you the most money?

Do you have to remain with your current energy supplier, or can you switch?

Can you have different tariffs from more than one supplier.

As the home battery market has surged, energy companies have begun to

introduce a range of smart tariffs, tailored to leverage these technologies for cost savings and efficiency. In this article, we will examine some of the best smart tariffs currently available and determine which ones offer the.

To maximise savings from a home battery, the electricity tariff is crucial. Here are the key elements to look for: Tariffs with cheaper overnight and daytime rates incentivise charging when electricity prices are lower. Real-time pricing allows charging when wholesale prices drop. Rates can even go. What is the best tariff for solar panels in the UK?

Remember, the best tariff for solar panels in the UK may vary based on individual circumstances and equipment. Octopus Energy's Intelligent Octopus Flux is currently the UK's best Smart Export Guarantee (SEG) tariff for solar panel owners.

How much does a solar & battery tariff cost?

This tariff offers a 25p per kWh rate – but there are many strings attached. First, you have to pay for a solar & battery installation carried out by either Good Energy Solar or JPS Renewable Energy – which the supplier acquired in 2024 – and sign up to a Good Energy import tariff, too.

What is the best electricity tariff in 2025?

There's no single best electricity tariff in 2025, only the right one for your specific setup and lifestyle. Got solar panels and a battery?

You'll be best off with a tariff like Octopus Flux. This has a cheap overnight rate for charging your battery and a generous export rate during peak hours.

What energy tariffs can I utilise with battery storage?

There are several energy tariffs you can utilise with battery storage, including: Time-of-Use Tariffs: These tariffs offer lower electricity prices during off-peak hours, such as night-time, to encourage usage during these periods.

What tariffs does good energy offer?

Good Energy offers two export tariffs for customers with solar panels, rewarding them for the electricity they export to the grid. This variable tariff offers a premium rate of 40p per kWh for customers who have had both solar panels and battery storage installed by Good Energy.

Do you qualify for a short-term solar tariff?

To qualify, you have to get your solar panels and battery through the supplier – but once the initial 12-month export contract ends, you'll be rolled onto a lower tariff. Here are the three most high-profile short-term tariffs, though one of them has now concluded, as temporary rates do. 1. Good Energy Solar Savings Exclusive
