

# Blackfin solar battery

## Overview

---

Is a solar battery a good investment?

Yes! A solar battery provides backup power, reduces electricity costs, and allows energy independence, especially in areas with high energy rates or frequent outages. Most lithium-ion solar batteries, like the Tesla Powerwall 3 and LG Home 8, last 10-15 years with proper maintenance.

Which battery is best for home solar storage?

Here are the main ones: **Lithium-Ion Batteries:** Consider these the top-dogs of home solar storage. Efficient, lasting, and light, you may know popular ones like Tesla Powerwall or LG Home 8. **Lead-Acid Batteries:** A bit older and less efficient, but they're kind to your wallet. They might be heavier, but they suit off-grid setups perfectly.

Which battery is better Enphase or Franklin?

Enphase offers a 10C battery, which offers higher capacity. Franklin is a relatively new entrant to the home battery storage space but has quickly cemented its position as offering a sleek all-in-one package that's simple to install and provides "whole home" backup.
