

Botswana energy storage power station subsidy policy 2023

Overview

In 2023, Botswana's government launched the Battery Boost Initiative, offering up to 40% rebates for commercial-scale energy storage systems. Think of it like a Black Friday sale, but for lithium-ion batteries instead of flat-screen TVs. What is the energy policy in Botswana?

This Policy is calling for an increase in private sector development and the IEP will suggest various available options for financing of infrastructure projects and programs in the energy sector of Botswana. The Policy seeks to provide a conducive legal, fiscal and regulatory environment to attract investment into the energy sector.

Does Botswana need a capacity building program?

In order to facilitate an effective development of the energy sector, the government of Botswana is obligated to build the necessary levels of human resource capacity across the board. Various actor groups have varying capacity needs hence capacity building programs should be tailored according to these various needs.

Can Botswana generate electricity from coal?

However, Botswana has ample renewable energy potential to augment generation from coal. Currently, solar energy contributes insignificantly to electricity generation despite the abundance of the resource. There is also wind and coal bed methane potential which have not been fully explored.

How to reduce end-use electricity consumption in Botswana?

Previously, some energy efficiency measures have been employed in Botswana to reduce the amount of end-use electricity consumption. A step-tariff Model was introduced by Botswana Power Corporation in 2010 to encourage efficient use of electricity. Again, efforts to reduce electricity demand were initiated at household level.

What is the main source of electricity in Botswana?

Coal is the main source of electricity generation in the country, followed by diesel. However, Botswana has ample renewable energy potential to augment generation from coal. Currently, solar energy contributes insignificantly to electricity generation despite the abundance of the resource.

How has the energy sector impacted Botswana's Economic Development Prospects?

Botswana has experienced some constraints in the energy sector in recent years, which to some extent have negatively impacted on the country's economic development prospects. A devastating power supply and demand mismatch was encountered between the years 2008 and 2014, and this breached the country's power supply security.

Botswana energy storage power station subsidy policy 2023
