

# **Brazil energy storage battery price inquiry**

## Overview

---

The cost of storage technology in Brazil has been falling consistently: average battery pack prices fell by 20% in 2024, reaching \$115/kWh, and should reach \$69/kWh by 2030.

The cost of storage technology in Brazil has been falling consistently: average battery pack prices fell by 20% in 2024, reaching \$115/kWh, and should reach \$69/kWh by 2030.

Brazil is set to conduct its first auction for adding batteries and storage systems to the national power grid, as reported by Reuters. The auction, to take place in June 2025, will include 300MW energy capacity purchase that could drive an estimated \$450m in investments from winning bidders.

The conditions are in place for the country's battery energy storage market to expand at a compound annual growth rate (CAGR) of 20% to 30%, as Holu Solar's Sophia Costa explained. From ESS News Brazilian energy suppliers raised the red flag in September 2024, signaling a rise in electricity costs.

Flexible generation and correlated solutions, including battery energy storage systems (BESS), are therefore likely to be at a premium in the future. Accordingly, in this article we delve into some key themes regarding the development and exploitation of battery storage solutions in Brazil.

The cost of storage technology in Brazil has been falling consistently: average battery pack prices fell by 20% in 2024, reaching \$115/kWh, and should reach \$69/kWh by 2030. High energy tariffs – according to the Brazilian Energy Trading Association (Abraceel), energy costs at an average of BRL 308.

It provides backup during peak summer demand and has an annual revenue cap of 27 million reais (USD \$4.6 million), the maximum allowed for a transmission operator. Despite the slow start, the local market is expanding fast. Demand for BESS components rose 89% from 2023 to 2024, and projections.

October 18, 2024: Brazilian minister of energy and mining, Alexandre Silveira

de Oliveira, has announced the country's first large-scale battery storage auction to be held in 2025. A public consultation ahead of the auction will be held in the coming days and, according to a draft of auction rules. Will Brazil conduct the first energy storage auction?

Brazil is set to conduct the country's first-ever energy storage auction for adding batteries and storage systems to the national power grid.

Can Brazil be a big battery storage country?

With well-designed policies and regulations, Brazil has significant potential to follow in the footsteps of jurisdictions like California and Chile for large-scale battery storage, Germany for distributed and large-scale storage, and Australia for both pumped hydro and large-scale battery systems.

Can foreigners invest in battery storage businesses in Brazil?

Investment, incentives and taxation scenarios According to Brazilian law, there are no legal restrictions on direct foreign investment in the battery storage businesses or in the power sector (except in very specific segments or sectors of the economy).

Will Brazil's energy auction improve power grid reliability?

Interest in the auction has been expressed by power companies such as Portugal's EDP and Brazil's ISA Energia. The auction will enhance Brazil's power grid reliability by integrating energy storage solutions for electricity generated from renewable sources such as wind and solar. US Tariffs are shifting - will you react or anticipate?

Are energy storage products coming to Brazil?

Holu's Costa observed batteries were prominent during the Intersolar South America trade show held in São Paulo at the end of August 2024. She added, hundreds of manufacturers are bringing energy storage products to Brazil.

Could pumped hydro be the missing piece in Brazil's energy system?

Conclusion Although energy storage solutions have yet to be widely deployed in Brazil, generation flexibility remains a scarce commodity. Therefore, storage projects, including pumped hydro, could be the missing piece needed

to enhance the country's energy system.
