

# Cairo power battery energy storage

## Overview

---

Cairo, Egypt, June 15, 2025 - IFC today announced an investment to support Egypt's first utility-scale battery energy storage system (BESS), deepening its partnership with AMEA Power, a leading renewable energy developer in Africa, the Middle East, and Central Asia.

Cairo, Egypt, June 15, 2025 - IFC today announced an investment to support Egypt's first utility-scale battery energy storage system (BESS), deepening its partnership with AMEA Power, a leading renewable energy developer in Africa, the Middle East, and Central Asia.

Cairo, Egypt, June 15, 2025 - IFC today announced an investment to support Egypt's first utility-scale battery energy storage system (BESS), deepening its partnership with AMEA Power, a leading renewable energy developer in Africa, the Middle East, and Central Asia, and the Government of Egypt to.

Egypt's iconic Cairo Power Station now boasts an energy storage battery system that could power the Great Pyramid's lighting for centuries (well, almost). As the world pivots to renewable energy, this Cairo Power Station level energy storage battery project isn't just a local upgrade - it's a.

Well, Cairo's new large-scale battery energy storage project isn't just talk - it's the real deal. With construction kicking off last month near the Benban Solar Park, this 1.1GW behemoth could store enough electricity to power 350,000 Egyptian homes during peak demand. But here's the kicker: it's.

Egypt's government has signed contracts with developer AMEA Power for two large-scale battery energy storage projects, the country's first. Dubai-headquartered AMEA Power announced yesterday (25 February) that it has signed government Capacity Purchase Agreements (CPAs) for the battery energy.

Chinese renewable energy group Sungrow Power Supply plans to build an energy storage battery factory in Egypt, the Egyptian presidency's spokesperson announced in a statement Sunday. The project was announced during a meeting in Cairo between Egyptian President Abdel Fattah al-Sissi

and Sungrow.

42% of the country's electricity needs by 2030. These include upgrading its power grid and incorporating pumped-storage hydroelectricity NGK Insulators and Sumitomo Electric Industries. The key applications of the project are onsite renewable generation shifting and renewables energy time shift.
