

Cheapest business energy storage installation offer in Philippines

Overview

Can battery energy storage systems transform business in the Philippines?

Battery Energy Storage Systems have the potential to transform how commercial and industrial companies in the Philippines manage their energy needs. With benefits ranging from cost reduction to energy supply stability, BESS is a compelling solution. While the initial investment may vary, the long-term advantages are undeniable.

Where is the first battery-based energy storage facility in the Philippines?

The plant, which will be the first battery-based energy storage facility in the Philippines, will be located next to the Masinloc power plant in Zambales. The energy storage array will enhance grid reliability by providing fast response ancillary services like frequency regulation.

Who provides fractionalized battery energy storage?

We are partnered with NexVolt, the first in the Philippines to provide fractionalized Battery Energy Storage. NexVolt, through their cutting edge technology, ensures even Small Medium Enterprises (SMEs) can adopt inexpensive battery energy storage systems and kickstart their journey towards energy independence. [Click Here For A Free Assessment!](#)

What is Masinloc battery energy storage?

We started our venture into battery energy storage technology in 2018 when we acquired the 10 MW Masinloc Battery Energy Storage System (BESS) of the Masinloc Power Plant from AES Philippines. The Masinloc BESS is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia.

How much does a battery energy storage system cost?

Larger facilities with higher energy demands will require more extensive and costly systems. Battery energy storage systems using lithium-ion technology

have an average price of US\$393 per kWh to US\$581 per kWh. While production costs of lithium-ion batteries are decreasing, the upfront capital costs can be substantial for commercial applications.

What is a battery energy storage system?

Battery Energy Storage Systems, commonly known as BESS, are advanced energy storage solutions designed to store electricity generated during periods of low demand or from renewable sources such as solar panels or wind turbines.

Cheapest business energy storage installation offer in Philippines

Top 100 Solar Energy Companies in Philippines (2025) , ensun

SolarNRG is a solar energy company in the Philippines that offers a wide range of services and products, including the design and installation of solar panel systems for various sectors. With ...

[Solarworks Philippines , Off-Grid Packages](#)

Off-Grid System 1Kw to 50Kw System This solution is intended for areas without a stable grid connection, constant power interruption and outages, or living in remote areas without electricity or unreliable power source. Batteries are ...
