

Cheapest off grid solar storage installation offer in Malaysia

Overview

Do you offer a full off-grid solar power system package?

Off-grid homes. For homes to go off the grid and depend on their own sustainable generation of electricity, we offer full off-grid solar power system packages to cover your home's electrical usage. We will assist you to calculate how much energy your home consumes for our solar engineers to find the right solar power system for you.

Can you live off-grid with a solar energy system?

Living off-grid is made effortless with our extensive range of plug-and-play solar energy systems. Our solar engineers will assist you and calculate how much energy your home consumes and find the right solar system for you. You won't be left in the dark. We offer energy storage solutions to keep your home powered even when the stars are out.

What is an off-grid solar power system?

Off-grid solar power systems are useful for remote places with no access to electrical points. They're also paired with generator sets, with the solar power system supplying electricity during the day while the generator set takes over at night (hybrid system). Hybrid systems are popular at islands or beaches too. Off-grid solar.

Can off-grid solar be used on remote islands?

While at remote islands with no access to the grid, off-grid solar is sometimes paired with a diesel generator to create a "hybrid" system that can help reduce intermittent power cuts and stabilise power around the island. We'd like to draw your attention to some of the best use cases for off-grid solar below: Off-grid homes.

Why should you choose an off-grid solar solution?

Our off-grid solar solutions would fit you no matter how near or far you wish to

have power at. Reap the benefits of having the sun on your back. Going for an off-grid solar solution is a conscious driven decision for reasons like a homeowner or agriculture worker looking to be non-reliant of grid power (or lack off).

What is a hybrid solar power system?

Hybrid system. Off-grid solar power systems are useful for remote places with no access to electrical points. They're also paired with generator sets, with the solar power system supplying electricity during the day while the generator set takes over at night (hybrid system). Hybrid systems are popular at islands or beaches too.
