

# China-europe energy storage vehicle investment

## Overview

---

Should China invest in Europe's battery and EV supply chains?

Chinese firms have also become major investors in Europe's battery and EV supply chains. This influx of Chinese foreign direct investment presents Europe with a strategic dilemma. There are clear short-term benefits: Chinese investment expands production capacity, sustains regional jobs and accelerates the decarbonisation timeline.

Is Chinese FDI a good investment for Europe's EV & battery sectors?

In this context, Chinese foreign direct investment (FDI) into Europe's EV and battery sectors is accelerating. This influx of capital offers clear benefits: it helps scale up production, creates regional jobs and supports achievement of climate targets. But it also raises strategic issues.

Are Chinese electric vehicles contributing to Europe's green transformation?

BRUSSELS, June 22 (Xinhua) -- In a move towards a sustainable future, Chinese electric vehicle (EV) manufacturers are contributing to Europe's green transformation, as revealed in a groundbreaking new report.

Are Chinese EV companies driving Europe's green transportation revolution?

With cutting-edge technology and robust products, Chinese EV companies are not just participating but are pivotal in driving Europe's green transportation revolution, highlighted by agreements such as BYD's deal with Swedish public transport leader Transdev AB.

Why did China invest in Europe in 2024?

Chinese investment in Europe rose for the first time in seven years in 2024, driven by a surge in electric vehicle and battery projects in Hungary, even as Chinese groups increasingly shunned the UK, Germany and France.

Do Chinese EV firms still consider the European market important?

\*A recent report found that over 60 percent of the 30 Chinese EV firms surveyed still consider the European market critical to their global strategies and plan to invest in Europe.
