

Container energy storage supplier quotation in Portugal 2030

Overview

What is the energy storage capacity in Portugal?

Energy storage installed capacity in Portugal is still predominantly based on hydropower pumping, which is today over 3 GW, and will increase to 4,164 GW when the Alto- Tâmega dam is completed this year. However, this paradigm is about to shift with the democratization of energy storage solutions with wind and solar production.

What does Portugal's energy storage tender mean for the energy transition?

Portugal's government has announced the outcome of an energy storage tender that will see the installation of 500 MW of energy storage capacity to support the country's energy transition. Energy storage battery. Photo by Anna Vasileva.

Why is storage important for the energy transition in Portugal?

With 21 318 GWh of electricity generated in Portugal between January and June 2022 - 57% of which of renewable origin - storage will be decisive for the much-desired energy transition for two major reasons. On one hand, storage will offset the intermittent generation of renewable energy.

What is the EnergyPLAN model for Portugal in 2030?

Results of the ENERGYPLAN model for Portugal in 2030 in the SP scenario. The emissions for all scenarios are close to zero (well below the target of target 4.3Mton), as the natural gas-fired plant is only used for a very few hours of the year. The cost of the system is, at worst, lower than 2023. 6.

How much energy will Portugal produce in 2030?

According to the NECP (which also includes the mainland and islands), the power generation sector is expected to reduce emissions by 83 % in 2030 compared to 2005, so the value considered for 2030 should be 4.34 Mton. As this study considers only the values of mainland Portugal, the value to be

achieved should be lower.

What is the reservoir capacity of Portugal?

The total reservoir capacity is equal to 13,290 hm³ and the biggest reservoir capacities can be found for Guadiana and Tagus, which are rivers with their origin in Spain . Portugal currently has an installed hydropower generation capacity of 8.2 GW (5.3 dammed hydropower plants and 2.9 run-of-river), from which 3.6 GW are pumped hydro storage.
