

Container energy storage tender price in Spain 2026

Overview

How much money will Spain spend on energy storage projects?

Spain's ministry for the ecological transition said on Friday it will allocate EUR 700 million (USD 799.4m) in grants through competitive tendering to support large-scale energy storage projects in an effort to improve grid flexibility and integrate more renewables. Is the capacity market a good investment in Spain?

The capacity market in Spain represents an opportunity for the storage sector but cannot be considered the sole basis for investment. Its design must be complemented by a diversification strategy in other electricity markets to ensure the profitability and sustainability of projects.

Does the capacity market guarantee the profitability of storage projects?

The capacity market is a mechanism designed to ensure the security of electricity supply, complementing revenues from generation, storage, and demand response. However, it should not be considered a tool to guarantee the profitability of storage projects.
