

# Cost for solar batteries

## Overview

---

Thinking about adding a battery to your solar panel system?

Learn what you can expect to pay and find out if the benefits outweigh the cost.

How much does a solar battery cost?

Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. You can expect to pay between \$7,000 and \$18,000 for a solar battery.

How much does solar energy cost?

By the end, you'll be better equipped to decide if solar energy is the right choice for your home. Cost Ranges: Solar panel batteries typically range from \$5,000 to \$15,000 for residential systems, while commercial systems may cost between \$10,000 and \$50,000 depending on the energy needs and battery type.

How much does solar battery maintenance cost?

The cost to hire a local solar company to inspect and maintain your battery system is anywhere between \$150 and \$300 on average. Solar batteries last longer when you maintain them regularly. Maintenance includes an inspection, rotating the batteries, and cleaning the terminals.

Is solar battery storage worth the cost in 2025?

Whether solar battery storage is worth the cost in 2025 is totally up to you and your energy goals. If you experience frequent or long-lasting power outages, then having battery storage for backup power can be a game-changer in keeping you safe, productive, and comfortable (not to mention keeping your food from spoiling!).

Should you invest in a solar battery system?

Whether you're ready to take your love of reusable batteries to the next level or make use of that excess solar energy your solar panels generate, investing in a solar battery system is a great way to harness the power of the sun for free electricity. But before you can start saving, you'll need to budget for the cost of a solar battery system.

Are solar batteries worth it?

Solar batteries typically cost \$10,877 after the federal tax credit—which expires for batteries installed after December 31, 2025—for the 13.5 kilowatt-hours (kWh) of storage a typical home needs to keep essential devices running during outages (also the size of a Tesla Powerwall 3). Whether they're worth it depends entirely on your situation.
