

Cost of batteries to store solar energy

Overview

A battery to store solar energy costs between \$5,000 and \$15,000. Factors affecting cost include brand and capacity. For instance, Tesla batteries are around \$1,000 per kWh. Installing a 12.5 kWh battery averages \$13,000 after a 30% tax credit.

A battery to store solar energy costs between \$5,000 and \$15,000. Factors affecting cost include brand and capacity. For instance, Tesla batteries are around \$1,000 per kWh. Installing a 12.5 kWh battery averages \$13,000 after a 30% tax credit.

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it.

It costs about \$11,000 to install solar batteries—how much you save depends on where you live. Why trust EnergySage?

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make.

The cost of installing a battery storage system varies based on capacity, installation complexity, and equipment needs. Prices range from \$6,000–\$23,000, but financial incentives – such as the 30% federal tax credit – can significantly reduce out-of-pocket expenses. This free guide explores what.

A battery to store solar energy costs between \$5,000 and \$15,000. Factors affecting cost include brand and capacity. For instance, Tesla batteries are around \$1,000 per kWh. Installing a 12.5 kWh battery averages \$13,000 after a 30% tax credit. Installation details and regional pricing also impact.

Here is a cost breakdown of a typical home solar battery installation: Battery: Most home solar batteries cost around \$5,000 to \$7,000 each, and

installations can include multiple units for expanded storage capacity.
Hardware: Batteries must be mounted and integrated with your home's solar energy. How much does solar battery storage cost?

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it from and how you plan to use it.

Is solar battery storage worth the cost in 2025?

Whether solar battery storage is worth the cost in 2025 is totally up to you and your energy goals. If you experience frequent or long-lasting power outages, then having battery storage for backup power can be a game-changer in keeping you safe, productive, and comfortable (not to mention keeping your food from spoiling!).

How much does it cost to install a solar battery?

Labor to install a solar battery costs \$2,000 to \$3,000 on average. Labor costs are lowest when installing a battery at the same time as a solar panel system. Retrofitting an existing system to add a new battery can increase labor costs by 30% to 50%. Solar battery installation may require additional electrical work:.

How much does a solar battery backup cost?

To ensure power for larger appliances or longer periods, you'll need to invest in multiple batteries. The cost of installing a solar battery backup system is anywhere from \$300 to \$15,000, with an average cost of \$6,000 for an entire home installation.

How much does home battery storage cost?

Installing home battery storage typically costs between \$6,000 and \$18,000, according to live pricing from solar.com's installation network. Why such a wide range?

The biggest factor is size, measured by how many kilowatt-hours (kWh) of electricity the battery can store. Battery systems can range from 5 to 40 kWh, depending on your energy needs.

Is solar battery storage a good investment?

Battery storage can be a good financial investment to lower long-term electricity costs at home with greater control over your solar energy use and savings. Storage also provides increased energy security and further carbon emission reduction potential. Are solar batteries safe?

Cost of batteries to store solar energy

[Solar Battery Storage System Cost \(2025 Prices\)](#)

A solar battery costs \$8,000 to \$16,000 installed on average before tax credits. Solar battery prices are \$6,000 to \$13,000+ for the unit alone, depending on the capacity, type, and brand.
