

Cost of solar battery for home

Overview

How much does solar battery storage cost?

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it from and how you plan to use it.

Are solar batteries worth it?

Solar batteries typically cost \$10,877 after the federal tax credit—which expires for batteries installed after December 31, 2025—for the 13.5 kilowatt-hours (kWh) of storage a typical home needs to keep essential devices running during outages (also the size of a Tesla Powerwall 3). Whether they're worth it depends entirely on your situation.

How much does it cost to install a solar battery system?

Most whole-home solar battery systems require a professional installation—especially if you need to rewire your home or directly work with your electrical wiring in any way. Hiring a local solar contractor to install your solar battery system costs anywhere from \$2,000 to \$3,500 on top of the cost of the solar battery system itself.

How much does a solar battery backup cost?

To ensure power for larger appliances or longer periods, you'll need to invest in multiple batteries. The cost of installing a solar battery backup system is anywhere from \$300 to \$15,000, with an average cost of \$6,000 for an entire home installation.

Is solar battery storage worth the cost in 2025?

Whether solar battery storage is worth the cost in 2025 is totally up to you and your energy goals. If you experience frequent or long-lasting power

outages, then having battery storage for backup power can be a game-changer in keeping you safe, productive, and comfortable (not to mention keeping your food from spoiling!).

Can solar batteries save you money?

Solar batteries can also save you money on utility power long-term. When utility costs are at their peak, you can pivot your home's energy consumption to run off of battery power rather than grid power, leveraging the electricity your solar panels generated when you need it most.
